ridgeback

2010/11 Range | ridgeback.co.uk

Welcome

Everywhere I look I see cycling.

Cycle cafes, cycle Fridays, kids training schemes, Barclay's Cycle Hire, maps, apps, Superhighways, the Olympics, Sir Chris Hoy, media coverage, the list goes on. It really is a welcome sight, cyclists and cycling being given serious consideration.

Of course many of us have been aware of the benefits for a long time. Apart from improved health and being an economical alternative to high fuel and ticket prices, riding a bike allows you to accurately time your journey. It's fast, efficient and provides freedom that other modes of transport just can't offer.

Looking at Ridgeback, there's much that's new this year. Ultraflight is a range of superlight flat bar bikes, which includes a very practical single speed. Those wanting a fast yet comfortable drop bar bike should take a look at the Road series. Versatile all-rounders, they're ideal for Audax, light touring and commuting. Finally, Switch is back. Re-designed and re-styled, these bikes are a great alternative to a mountain bike.

Since 1983 Ridgeback has been building bikes for UK riders and has an unmatched reputation for innovation and quality. From high performance road bikes to comfortable commuters, Ridgeback continues to lead the way. Whatever your particular style of riding, there's a Ridgeback that's right for you.

Designed for a smooth ride

Guaranteed for life.

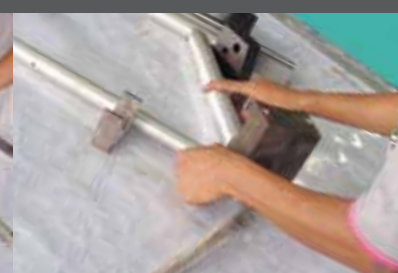

Frame tubes are precisely mitred

Checking seat stay configuration

Initial set up against frame drawings

Inspecting frame alignment

Thanks to lighter weight aluminium and steel alloys the traditional bike frame has attained new levels resilience and responsiveness.

We can chose from other manufacturer's components to give the best set-up, but it's the frame that has the greatest influence on ride feel. Luckily it's the component that can be most adapted to perform way we need it to.

All Ridgeback frames are designed to provide the best blend of performance, handling and ride quality. Meticulously constructed from lightweight aluminium or Reynolds steel, tube diameter and wall thickness are specified according to frame size and intended use.

Whilst similar parts specifications are common to many bike brands, Ridgeback frame geometries are designed to work with the forks, stems and tyres, and relevant riding style to ensure that everything is in balance and working together to maximum advantage. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.

The fastest way into work

Responsive road bikes with the versatility to cope with rugged urban conditions.

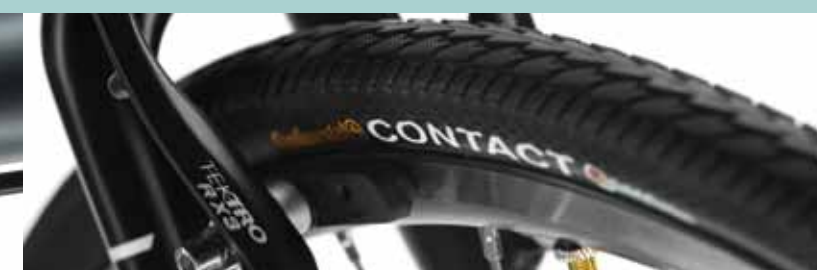

Shimano Deore M595 disc brake

Shimano SL-R440 controls

Clearance to fit up to 37c width tyres

Continental puncture resistant tyres

Tarmac, towpath or trail, a Flight series Ridgeback is innovative and versatile and is rapidly becoming the benchmark for fast commuter sports bikes.

Designed for high performance commuting. Flight bikes use Continental puncture resistant tyres and all frames are built with enough clearance to take wider tyres if required.

Shimano hydraulic disc brakes provide incredible stopping power in all conditions and need little adjustment as there are no cables and pad wear is low. A short cage Shimano derailleur and compact

chainset compliment the bike's sleek look while providing a wide enough gear range for all but the most extreme hills. The inclusion of mudguard and rack fittings across the range confirms the commuter practicality of these exciting bikes.

Quick and adaptable, a Ridgeback Flight performs at the highest level on city streets, in rugged urban conditions and even on light off road trails.

Lightening speed

The original flat bar road bike.

Back in 2001 Ridgeback created an entirely new genre of fast commuter sports bike the flat bar road bike. Quite simply, it's a road racing bike equipped with a straight, mountain bike handlebar.

Since then the category has undergone considerable evolution. Available in two basic styles, the Flight series is a versatile and more rugged version of the concept whilst Ultraflight embodies all the fundamentals of the original design.

With a close clearance frame, tough wheelset and Continental tyres, Ultraflight blends nimble handling and fast acceleration for an exceptionally smooth ride.

Ultraflight 01 is a little different and is all about simplicity. Built with a little more clearance, the inclusion mudguard and rack fittings make it an ideal low maintenance commuter, offering practicality not normally found on single speeds.

Weekend getaway

Highly versatile drop bar bikes for transport to training and everything in between.

Ridgeback road bikes are influenced by frame geometries that have been ridden and raced in a very similar layout for over fifty years. Today we have better materials in wider range of sizes however it's hard to beat the proven angles of a classic race bike. Too steep at the front and fast descents can be nerve-wracking. Get the seat angle wrong and rider position can easily be thrown out of balance.

Constructed to a geometry designed for comfortable power output and confident handling, a Ridgeback road bike has deep drop brakes and is built with generous clearance for 28c tyres. Seat stay rack mounts make load carrying easy and German made SKS mudguards feature Secu-clip safety stays.

An aluminium or Reynolds steel frame and carbon fork combine to create a beautifully balanced bike for a rewarding ride whatever the distance. A Shimano compact double transmission, robust wheelset and Continental tyres complete the package.

Fast, light and responsive, a Ridgeback road bike ensures there's always great riding to be enjoyed.

Continental puncture resistant tyres

Heat treated Reynolds 725

Expedition quality Blackburn racks

Long distance tourer, rugged commuter or just for day rides, a Ridgeback World series bike offers a cycling experience steeped in history but with the benefit of contemporary technology.

Built to exacting specifications, frames are constructed to a size specific geometry to ensure stability and sure handling, even when fully loaded. Hand welded using Reynolds steel tubing, a World series Ridgeback provides a responsive, comfortable ride with the structural reliability essential for a traditional expedition bike.

Designed for long periods in the saddle in remote locations, World series bikes are sensibly specified. A square taper bottom bracket allows replacement with a simple, readily available cup and axle unit whilst brazed down tube cable stops mean traditional gear levers can be used if required. Blackburn racks and bottle cages are fitted because of their proven touring heritage. A leather covered saddle completes the package.

Around town

A Ridgeback Rapide series bike offers the perfect combination of speed, comfort and practicality.

Light weight 6061 Aluminium frame

Continental puncture resistant tyres

Comfortable ergonomic saddle

Powerful V-brakes

Robust Shimano cassette hub

Triple density comfort grips

Adaptable and stylish with the durability needed for everyday use. A short test ride of one of these benchmark commuter hybrids will confirm why so many people choose a bike from this popular category.

With the strength of a mountain bike, road geometry and fast rolling 700c wheels, the Rapide's sleek aluminium frame is built using size specific tubing to provide a responsive yet resilient ride. Mudguard and rack fittings are standard as are Continental puncture resistant tyres.

With wide ratio gearing, comfortable grips and an ergonomic saddle, a Ridgeback Rapide is commute ready as well as being a practical and fun way to get around town.

Complete travel flexibility

A folding bike is ideal for the whole family.

Great for those impromptu trips, a Ridgeback folding bike offers fast reliable transport and all models come with a tough nylon carry bag.

As train companies increasingly restrict the carriage of large wheel bicycles during peak hours, the practical portability of a folding bike becomes quickly apparent. A bike in a bag is no longer a bike!

As urban commuter, quick errand run-around or just because space is limited, a Ridgeback folding bike offers a smooth stable ride and yet is amazingly compact when folded.

Comfort and control

A stylish solution for people on the move.

Metro series bikes are lightweight and comfortable and have lots of useful features to make cycling as simple as possible. With the upright feel of a traditional town bike complimented by modern lightweight technology, comfort and low maintenance are the Metro's priority.

Built to a high quality specification, a Metro series Ridgeback offers easy shifting, great brake performance and not too many gears. A lightweight aluminium frame with a low 'standover height' design allows easy mounting and dismounting for stability and safe handling.

A comfy saddle, suspension seat post and smooth rolling puncture resistant tyres enhance the Metro's luxurious feel. All you have to do is enjoy the ride.

Tough street racers

First and foremost an inner-city machine but perfectly at home on any terrain.

Powerful Shimano brakes

Shimano controls and triple density grips

Robust Shimano cassette hub

Continental Double Fighter II tyres

Offering versatility and style, Switch is a rugged street bike that's also highly capable off-road. With a new frame design and improved component mix, the popularity of this tough mountain bike offshoot looks set to continue.

Robustly built to handle all conditions, Switch series bikes use tried and tested mountain bike geometry with a lower bottom bracket and angles adjusted for urban conditions.

Specified with a straight bladed Cro-Moly fork, all models use a 48 tooth triple chainset for fast road riding, whilst having the additional benefit of wide

ratio mountain bike gearing to cope with nature's undulations out on the trail.

Continental Double Fighter II tyres, triple density lock-on grips and a Kevlar reinforced saddle complete the package, broadening the appeal of this versatile series. Switch - tough street racer, towpath bike and non suspension mtb.

Off the beaten track

Rugged mountain bikes designed for durability and comfort.

Ridgeback mountain bikes are where it all began. The Terrain series line up features five great bikes that ride with confidence inspiring ease. Using a classic single-track geometry, the ride position allows the rider to move their weight around effectively for maximum response from minimal input, as well as encouraging the best front-to-rear weight distribution.

Reactive and intuitive they deliver big ride feel with front suspension comfort. Built with 'go anywhere' ability, a Ridgeback mountain bike is as strong as it is agile be it a twisty single track or a leisurely ride in the park.

For more relaxed riding the MXK offers the best of all worlds. A high front end, riser handlebar and wide sprung saddle provide an upright riding position for great visibility and comfortable easy pedalling.

Perfectly proportioned to provide small riders the best fit for comfort and control a Ridgeback kid's bike is easily adjustable to keep pace with a growing child.

From beginner bike to 24 inch wheel, all bikes have a light aluminium frame and high quality specifications providing the necessary durability to allow them to be passed on to a second child.

Designed to meet the challenging demands of three to twelve year olds. A close up look and a quick test ride will confirm why so many people choose Ridgeback when buying a children's bike.

All Ridgeback children's bikes meet the relevant CEN safety standard. Please go online for weights, stand-over height and other information.

Real bikes not toys

Start them off right.

With a robust, light aluminium frame that allows the child to lift and handle their bike with ease, a Ridgeback boys bike is engineered to take the knocks and built to last, offering long term reliability and unbeatable value for money.

Every Ridgeback boy's bike is constructed to the same exacting standards as an adult bike and undergoes professional assembly and safety checking by qualified bicycle mechanics.

Early learning

Balance is quickly learned without the distraction of pedalling.

Scoot
£89.99 available in 5 colours

The transition between walking, freewheeling and steering is simple. The Scoot's rear brake establishes early understanding of how to slow down. Once balance is mastered, it's then just a small step to move onto a bike with pedals without the need for stabilizers.

Supplied with two seat posts for widest sizing range, Scoot has a very high specification level including a lightweight alloy frame, alloy rims and semi slick tyres. The saddle incorporates a neat carry handle for those tired or tantrum moments and with full bearings throughout, domed wheel nuts and safety tabs as well as a V-brake, there is no better beginner bike.

Visit us online - ridgeback.co.uk

Find a bike and check the spec ...

Complete information on each bike including weight, geometry and standover height.

Have your say...

Rider response is essential. Let us know what you think of your Ridgeback and see what other owners have to say. Just click on Feedback. Or if you have a question, use Contact.

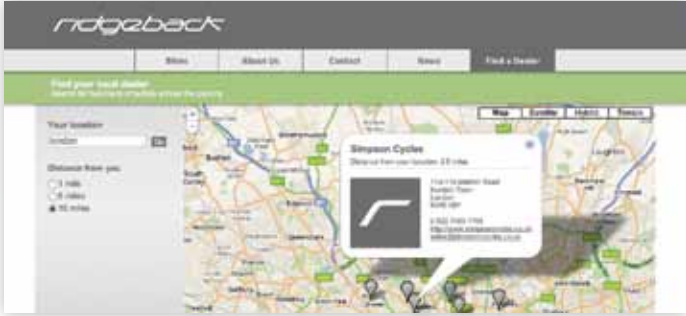

News, advice and comment ...

Blog format news, stories and information.

Compare models ...

Search by series or model and use the compare feature to show side by side comparison of two bikes.

Find a local stockist ...

A Ridgeback dealer offers complete advice and provides first class after sales service, as well as a free 30 day tune up. Because a bike is a safety critical product, we always recommend collecting your bike in person from an authorised Ridgeback stockist.

Pedal for the planet ...

For every Ridgeback sold, a donation is made to organisations promoting the use of bicycles. Bikes and riding preserve our environment. By making cycling our first choice transport, we can all help to ensure our planet is still a great place to ride in the years to come.

Price and Specification ...

Prices include VAT at current rate and are correct at time of printing. We reserve the right to revise SRP and specification without notice. Please check on-line for current SRP and specification.

Continuous improvement ...

As improvement is ongoing, you'll find models 'in store' with specification and colour differences to those featured in the brochure. We recommend you go online for the latest information on range and specification.

Guaranteed for life ...

Ridgeback means quality. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.
