Toby Howes
Head of Product Design

Cycling goes mainstream

A few years ago in a previous introduction, I wrote that cycling seemed to be everywhere I looked. With hindsight, cycling's more mainstream public presence was in its infancy back then. Today it's firmly established. Cycle cafes, cycle Fridays, kids training schemes, Boris bikes, maps, apps, superhighways, British world champions, media coverage. The list goes on. It really is a welcome sight to see cyclists and cycling being given serious consideration.

After all, cycling is a simple pursuit which for a relatively small outlay can provide many benefits. As well as improved health and offering a cost-effective alternative to high fuel and ticket prices, riding a bike allows you to accurately manage your journey time. It's fast, efficient and provides freedom that other modes of transport just can't offer.

At Ridgeback we continue to look at everything cycling to make sure each new range meets the varied needs of today's cyclists.

There's much that's new this year.

Flight gets a semi-hydroformed frameset and all models now have hydraulic disc brakes. The new Advance series is a range of quick yet comfortable road bikes ideal for commuting and weekend touring. If you want a versatile all-rounder, take a look at Dual Track. They're easy to ride and handle well under load whether you're carrying luggage or using a child seat.

Other new arrivals include the World series Tour. At £599.99 it's a great first tourer or robust commuter. Finally, we're now offering a 20" wheel boy's and girl's bike with a simple steel fork. RX20 & Cherry are slightly lighter than their suspension fork equivalents and are aimed at a more tarmac orientated rider.

There's never been a better time to be cycling, so whatever your riding style, we're sure you'll find a Ridgeback that's right for you in this year's brochure and online at ridgeback.co.uk.

MAKING HISTORY

Since 1983 Ridgeback has been building bikes for UK riders and has an unmatched reputation for innovation and quality. From high performance flat bar and touring bikes to comfortable commuters and children's bikes, Ridgeback leads the way. Toby Howes looks back at some of Ridgeback's landmark bikes.

The first Ridgeback

Nearly 30 years ago in 1983, Ridgeback launched the UK's first mountain bike.

Roxy

1990 saw the arrival of the Ridgeback Roxy, an early forerunner of today's Rapide series - the benchmark by which all other commuter bikes are measured.

2002 : Genesis Day 03

Something totally new

In 2001 we created the flat bar road bike. Originally named Genesis, this new breed of fast commuter sports bike is seen as one of the last significant developments in cycle genres.

Despite having undergone significant evolution, Ridgeback's award winning design continues today in the Flight series.

2003 : The Switch Storm

Mountain or street bike?

Ridgeback's Urban series were another trend setter. In 1998 these slick tired, street mountain bikes were not only lots of fun to ride but provided a serious alternative to the more traditional commuting bike. Becoming the Switch series in 2003, they ran right up until last year.

2006 : Dual Track Advance

Big wheels keep on rolling

Other milestones include, Dual Track, a robust all rounder with 29" wheels aimed at riders looking for a more comfortable off road experience. Originally designed as a mountain bike, today's Dual track is more off-road hybrid than mtb.

Using 700c road rims instead of traditional 26 inch wheels, the Dual Track's larger tyres give the bike a longer contact patch for improved traction whilst rolling over lumps and bumps more smoothly.

2008 : 25th Anniversary

25th Anniversary

In 2008, to mark our 25th anniversary, the R25 was launched. This was a limited edition of one hundred very special flat bar road bikes. Based on a prototype bike I was riding at the time, the R25 was Ridgeback's most advanced flat bar bike to date.

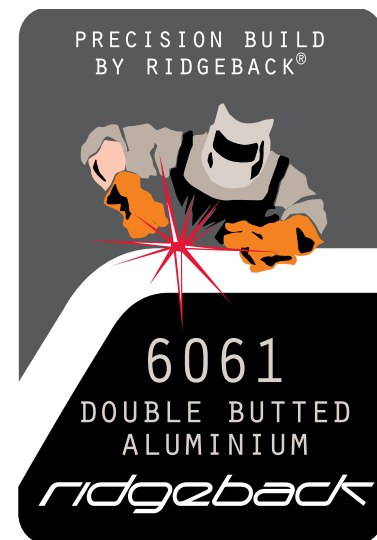

Five years on and it's now clear that the R25 was a precursor of the future of braking on performance flat bar bikes, as it was equipped with Shimano Deore XT hydraulic discs, capable of awesome stopping power. Today, all Flight series bikes are equipped with hydraulic disc brakes.

FRAME TECH

4

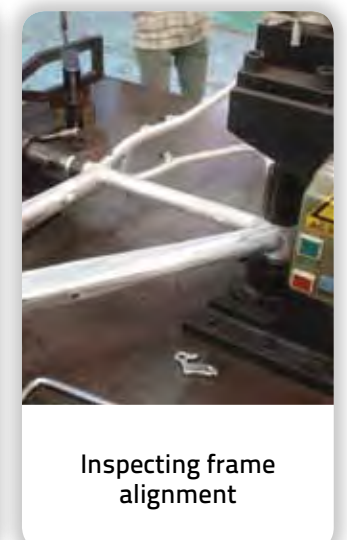

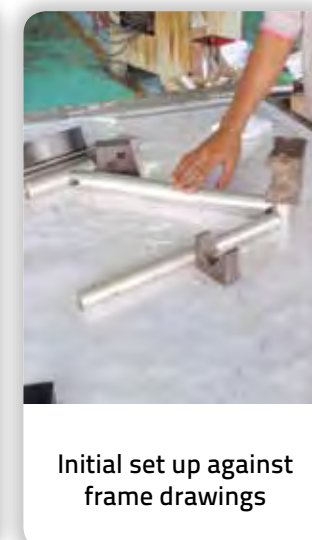

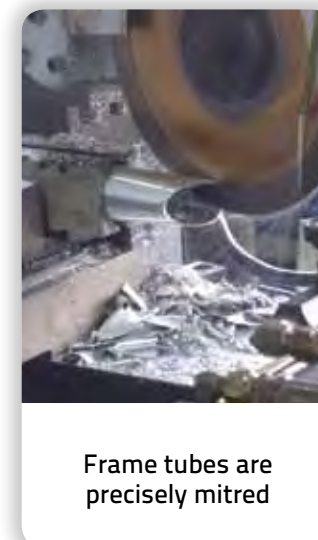

Thanks to lighter weight aluminium and steel alloys the traditional bike frame has attained new levels resilience and responsiveness. We can chose from other manufacturer's components for the best set-up, but the frame has the greatest influence on ride feel. Luckily it's the component that can be most adapted to perform the way we need it to.

All Ridgeback frames are designed to provide the best blend of performance, handling and ride quality. Meticulously constructed from lightweight aluminium or Reynolds steel, tube diameter and wall thickness are specified according to frame size and intended use.

Whilst similar parts specifications are common to many bike brands, Ridgeback frame geometries are designed to work with the forks, stems and tyres, and relevant riding style to ensure that everything is in balance and working together to maximum advantage. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.

5

Frame

Built using lightweight aluminium or steel tubing, Ridgeback frames have a geometry designed for comfortable power output and confident handling. Constructed with generous tyre clearance as well as useful mudguard and rack fittings, the frame provides a balanced blend of comfort and ride quality.

Tyres

Continental tyres are all about reliability. New technology has enabled the use of tougher yet lighter materials to radically reinforce tyres against intrusion from sharp objects. In simple language, whilst not yet a thing of the past, punctures are now few and far between.

Shimano

Probably the most important name in cycling. While all brands use Shimano components to some degree, Ridgeback strives to use complete Shimano transmission systems where specifications allow to provide the highest level of shifting function and reliability.

Disk Brakes

Perfect for regular city riding, hydraulic disc brakes have a safe, modulated lever feel and provide incredible stopping power in all conditions, especially in the wet. Additionally little adjustment is needed as pad wear is low.

Anatomy of a commuter

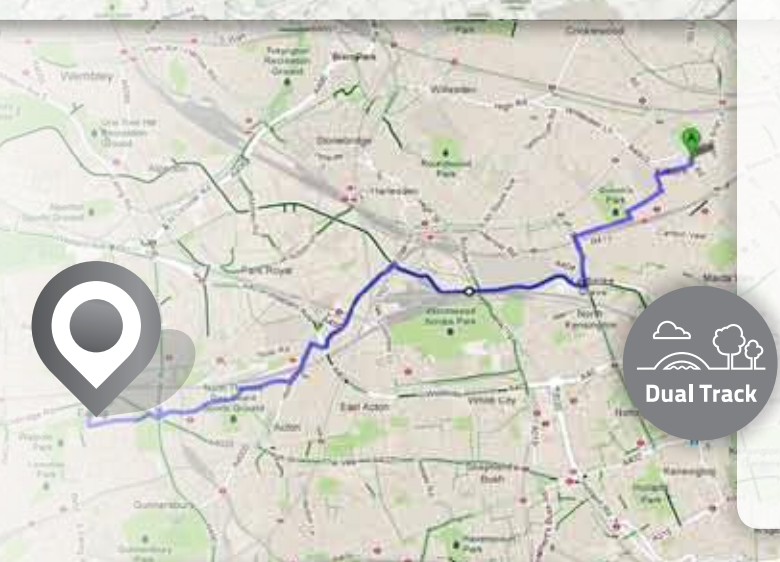

Flight range page 50 - 59

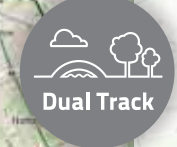

Chris:
Balerno to Edinburgh Quay
 Until recently my ride was six miles but I've recently discovered a really tranquil towpath route and now the journey is closer to seven miles and takes about 10 minutes longer. It's worth it though as I prefer riding along beside the canal.
Model: Flight 03
Ride frequency: Daily

Dual Track range page 40 - 49

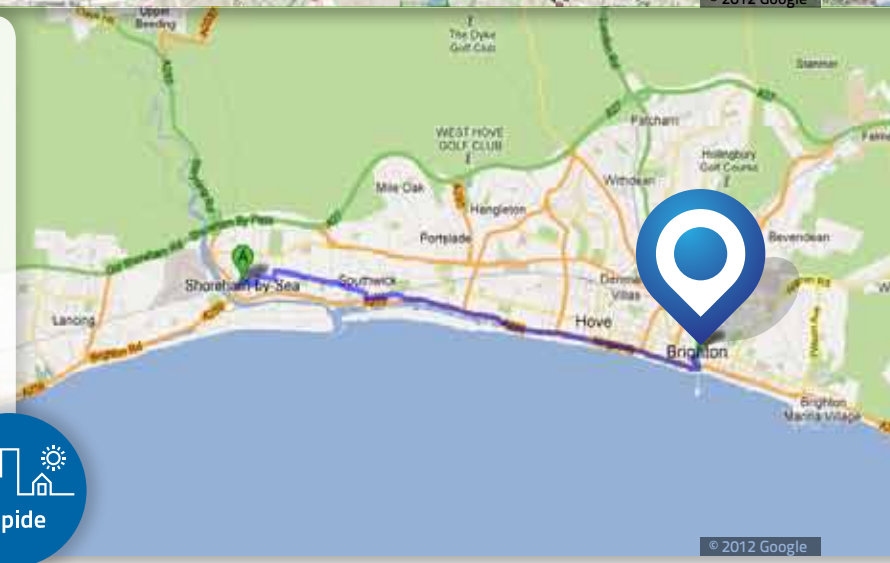

Vanessa:
Kilburn to Ealing
 Using main roads, it's a five mile commute to my practise however I know lots of shortcuts and if I'm really going for it I can get my time down to less than 25 minutes. I've cycled regularly for five years now and don't think I'd ever go back to driving.
Model: Dual Track x2.3
Ride frequency: At least three times per week

Rapide range page 12 - 31

Stuart:
Shoreham to Brighton
 Riding along the seafront beats public transport every which way. Of course down here, the weather can be challenging but cycling is easily doable with the right clothing so I still manage to bike in most days.
Model: Velocity
Ride frequency: Almost every day

Rapide

A Ridgeback Rapide series bike offers **the perfect combination** of speed, comfort and practicality.

Metro

With the upright feel of a traditional bike, a Metro series Ridgeback offers **easy shifting, great brake performance** and not too many gears.

Dual Track

A robust all-rounder that's **self-assured** on rough terrain yet feels **comfortably balanced** on city streets and canal towpaths.

Flight

Quick and adaptable, a Ridgeback Flight **performs at the highest level** on city streets, in rugged urban conditions and even on light off road trails.

Advance

Highly versatile bikes **for transport to training and everything in between.**

World

Long distance tourer, rugged commuter or just for day rides, a World series bike offers **a cycling experience** steeped in history but with the benefit of contemporary technology.

Terrain

Off-road bikes **designed for durability and comfort.**

Kids

All Kids Ridgebacks have a light aluminium frame that **allows a child to lift and handle their bike with ease.**

AROUND TOWN & WEEKENDS AWAY

12

13

Built for commuting and everyday riding, a Ridgeback Rapide offers the perfect combination of speed, comfort and practicality.

ADAPTABLE AND STYLISH WITH THE DURABILITY NEEDED FOR EVERYDAY USE

14

15

Continental Contact tyres offer practical puncture resistance

Women's open frame design

Shimano cassette hub is rugged and reliable

Hand welded aluminium frame

A short test ride of one of these benchmark commuter hybrids will confirm why so many people choose a bike from this popular category.

With the strength of a mountain bike, road geometry and smooth rolling 700c wheels, the Rapide's sleek aluminium frame is built using size specific tubing for a responsive yet resilient ride.

Reliability is essential when a bike is used for daily transport. A full Shimano drivetrain ensures accurate and consistent shifting over time whilst Continental puncture resistant tyres make a significant contribution to many puncture free miles. Mudguard and rack fittings are standard on all Rapide models.

With wide ratio gearing, ergonomic triple density grips and a comfortable saddle, a Ridgeback Rapide is commute ready as well as being a practical and fun way to get around.

EASY CYCLING

A stylish solution for people on the move. Metro series bikes are lightweight, comfortable and make cycling as simple as possible.

LIGHTWEIGHT & COMFORTABLE

34

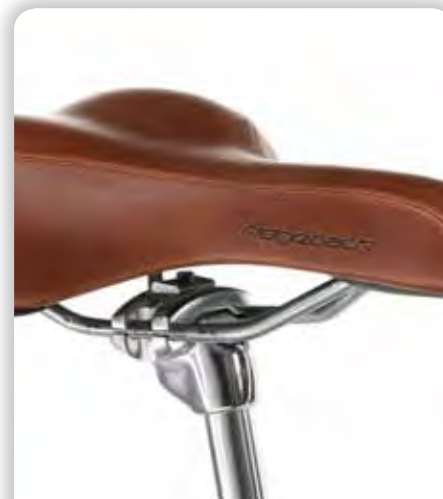

35

Single speed simplicity

Shimano EZ Fire controls for quick and accurate shifting

Comfortable saddle and suspension seat post

Lightweight aluminium frame

With the upright feel of a traditional town bike complimented by modern lightweight technology, comfort and low maintenance are the Metro's priority.

Built to a high quality specification, a Metro series Ridgeback offers easy shifting, great braking and either three or six gears. There's even a beautifully simple single speed model.

A light aluminium frame with a 'low standover height' unisex design allows easy mounting and dismounting for stability and safe handling.

A comfy saddle, suspension seat post and smooth rolling, puncture resistant tyres enhance the Metro's luxurious feel.

TARMAC AND TRAIL

40

41

Offering versatility and style, Dual Track is a tough trail bike that doubles as a highly capable urban commuter.

A ROBUST ALL-ROUNDER

42

Powerful hydraulic disc brakes

SR Suspension with lock out

Responsive Cro-Moly fork

Puncture resistant Continental
Contact tyres

43

Self-assured on rough terrain yet feels comfortably balanced on city streets and canal towpaths.

Sometimes referred to as a 29'er, Dual Track has its roots in mountain biking but in reality the design is more off-road hybrid than mtb. Using 700c road rims instead of traditional 26 inch wheels, the Dual Track's larger tyres give the bike a longer contact patch for improved traction whilst rolling over lumps and bumps more smoothly.

Specified with either a straight bladed Cro-Moly or SR suspension fork, all models use a 48 tooth triple chainset for fast road riding whilst having the additional benefit of wide ratio mountain bike gearing to cope with nature's undulations out on the trail.

Wide section Continental or Maxxis tyres, triple density lock-on grips and a Kevlar reinforced saddle complete the package. A Ridgeback Dual Track is a tough urban commuter and weekend off-roader and is the latest and most practical embodiment of the 29'er or large wheel trail bike concept.

THE FASTEST WAY TO WORK

50

51

Responsive, practical and comfortable, a Ridgeback Flight is equipped with powerful disc brakes and is ideal for fast commuting.

QUICK AND ADAPTABLE

52

Puncture resistant Continental Contact tyres

Tektro hydraulic disc brake

Shimano Alfine chainset

Shimano Deore rear derailleur

Ridgeback Flight performs at the highest level on city streets, in rugged urban conditions and even on light off road trails.

Designed for fast commuting, Flight bikes use robust 28c width Continental Contact puncture resistant tyres. However frames are built with enough clearance to take wider tyres up to 37c.

Perfect for regular city riding, hydraulic disc brakes provide incredible stopping power in all conditions, especially in the wet, needing little adjustment as pad wear is low.

A wide ratio Shimano drivetrain with triple chainwheels provides a range of gears capable of coping with virtually any gradient and the inclusion of mudguard and rack fittings further underlines the commuter practicality of these exciting bikes.

LONG DISTANCE TOURER, RUGGED COMMUTER OR JUST FOR DAY RIDES

72

73

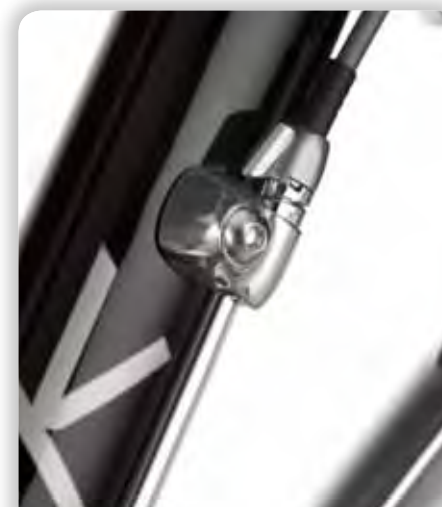

Full Reynolds 725 frame

Shimano cassette hub

Shimano cantilever brakes

Shimano cable adjuster

The Ridgeback World series bike offers a cycling experience steeped in history but with the benefit of contemporary technology.

Built to exacting specifications, frames are constructed to a size specific geometry in a wide range of seat tube lengths to ensure stability and sure handling, even when fully loaded. Hand welded using Reynolds steel tubing or 6061 aluminium; a World series Ridgeback provides a responsive, comfortable ride with the structural reliability essential for a traditional expedition bike.

Designed for long periods in the saddle in remote locations, World series bikes are sensibly specified. A square taper bottom bracket allows replacement with a simple readily available cup and axle unit, whilst brazed down tube cable adjusted bosses mean traditional gear levers can be used if required.

All models are supplied with a sturdy four point aluminium rack and all but the Tour are fitted with a frame fit pump.

RIDGEBACK MOUNTAIN BIKES ARE WHERE IT ALL BEGAN.

Kenda Karma 29'er tyre

Tektro hydraulic disc brakes

Light aluminium frame

Shimano 21spd transmission

The Terrain series line up features three great bikes that ride with confidence inspiring ease.

Using a classic single-track geometry, a Ridgeback mountain bike is reactive and intuitive delivering big ride feel with front suspension comfort. The x0.2 has traditional 26 inch wheels, whilst the x0.4 is a 29'er using 700c rims and larger 29" tyres which give the bike improved traction and the ability to roll over lumps and bumps more smoothly.

A triple chainset, wide ratio cassette and easy shifting make light work of the ups and downs out on the trail.

Built with go anywhere ability, a Terrain series Ridgeback is as strong as it is agile whether negotiating a twisty single track or a enjoying a leisurely ride in the park.

Balance is quickly learned without the distraction of pedalling.

Light aluminium frame

Alloy V-brake

Easy carry handle

The transition between walking, freewheeling and steering is simple. The Scoot's rear brake establishes early understanding of how to slow down. Once balance is mastered, it's then just a small step to move onto a bike with pedals but without the need for stabilisers.

Supplied with two seat posts for widest sizing range, Scoot has a very high specification level including a lightweight alloy frame, alloy rims and semi slick tyres.

The saddle incorporates a neat carry handle for those tired or tantrum moments and with full bearings throughout, domed wheel nuts as well as an alloy V-brake, there is no better beginner bike.

ACCESSORIES

Get more out of cycling. A Ridgeback would not be complete without products to enhance the experience. Here are some recommendations to keep you safe, maintain your bike and if you have children, allow them to enjoy it with you. For more information, please visit madison.co.uk

108

Kryptonite Locks

Serious security is the only business Kryptonite is in. They are committed to providing innovative products to make sure that your bike remains where you left it. Kryptonite is a premier manufacturer of high-quality cables, chains, U-locks and flexible security systems for bicycles everywhere, wherever they are used, and wherever they are parked.

KRYPTONITE

109

Madison Clothing

Madison clothing offers a range of the essential cycle clothing for all riders, with a wide range of sizes, shapes, and prices. The benefits come from improved comfort on the bike, and although all levels of rider will benefit from using a few items of specialist clothing, it is the occasional rider who will feel the biggest benefit.

MADISON

Giro Helmets

Giro Helmets offer an unbelievable combination of performance, value for money and style. Acu-Dial fit system provides one handed micro adjustment whilst on the move and ensures a perfect custom fit for every rider. Advanced strap management keeps everything in place to allow further fine tuning for a safe and secure fit. In-mould hardbody adds strength and protection for no extra weight penalty. Additional rear exhaust vents pull air through the helmet even when riding uphill and at slower speeds.

GIRO

Blackburn Pumps

Blackburn pumps are part of a range that offers reliable performance whatever the product. The Air Tower 2 has a stiff barrel and welded steel base to keep it firmly on the ground to provide a wobble free platform whilst pumping. Dual head Presta and Schrader hose is totally re-buildable and ergonomic T-handle offers comfort and clever storage for patch kits, tyre levers and gym ball adaptors (included). Maximum pressure 140 psi. No-quibble Blackburn lifetime warranty.

electron.
bright ideas

Electron Lights

Electron lighting systems use the latest technologies and designs to offer great performance and durability. The Electron range covers all types of riders needs and includes some exceptional products for situations where battery life and performance are of prime concern. From Halogen front lamps to micro sized LED backup lights, take a look at the range and see what the latest lighting technology has to offer.

Finish Line Lubricants

Everything you need to keep your bike running and looking like new. Since 1988, Finish Line has been proud to offer the best selling, highest quality, bicycle-specific care products available. Take a look at how they can help make your bike easier to pedal, shift better, and last longer. Finish Line Wet Lube is a long lasting and highly water resistant lube and offers proven performance on tours, in muddy off-road conditions and on long rainy commutes.

Park Tools

Park Tool has been manufacturing bicycle-specific tools since 1963, and is the world's largest bicycle tool manufacturer. A long-term dedication to quality, innovation, and customer service has made Park Tool the first choice of professional and home bicycle mechanics around the world: whatever the task, you can rely on Park Tool to provide the right tool for the job.

RIDGEBACK CONNECTED

Keep updated with news, send us feedback and find your nearest dealer.

ridgeback.co.uk

Bell Kids Helmets

All helmets feature Bell's Fusion In-Mould construction and are lightweight and durable for enhanced performance and protection. The Ergo Dial fit system arcs inward to cup and cradle the rider's head as it tightens to ensure a perfect fit.

Intuitive dial adjustment allows one-handed adjustments to be made quickly and safely even when riding along. Velcro-less pad fitting system allows simple removal for washing and can be re-fitted time and time again.

CoPilot Child Seats

Child seats are a great way for you to enjoy cycling with the youngest member of the family, and are an important first step to introducing the joys of cycling to the next generation. With in-house design, research

and development; rigorous endurance testing, and bone shattering shake testing, CoPilot child seats have set the industry standard for years.

Find a bike and check the spec ...

Complete information on each bike including weight, geometry and standover height.

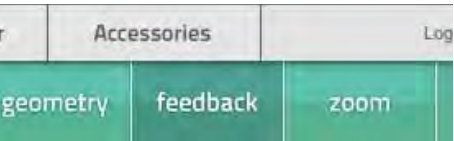

Find a local dealer ...

A Ridgeback dealer offers complete advice and provides first class after sales service, as well as a free 30 day tune up. Because a bike is a safety critical product, we always recommend collecting your bike in person from an authorised Ridgeback stockist.

Have your say...

Rider response is essential. Let us know what you think of your Ridgeback and see what other owners have to say. Just click on Feedback. Or if you have a question, use Contact.

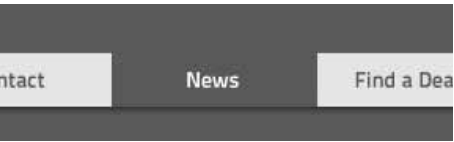

Compare models ...

Search by series or model and use the compare feature to show side by side comparison of two bikes.

News, advice and comment ...

Blog format news, stories and information.

Pedal for the planet ...

For every Ridgeback sold, a donation is made to organisations promoting the use of bicycles. Bikes and riding preserve our environment. By making cycling our first choice transport, we can all help to ensure our planet is still a great place to ride in the years to come.

Price and Specification ...

Prices include VAT at current rate and are correct at time of printing. We reserve the right to revise SRP and specification without notice. Please check on-line for current SRP and specification.

Guaranteed for life ...

Ridgeback means quality. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.
