## Ridgeback is 30

As with most things in life, things change and one of the most apparent changes in recent years has been cycling's more mainstream public presence.

After all, cycling is a simple pursuit which for a relatively small outlay can provide many benefits. As well as improved health and offering a cost-effective alternative to high fuel and ticket prices, riding a bike allows you to accurately manage your journey time. It's fast, efficient and provides freedom that other modes of transport just can't offer.

Once just a single mountain bike, Ridgeback is now in its 30th Anniversary year, offering a diverse selection of models to meet the needs of a broad spectrum of riders.

Highlights from new range include: The World series Expedition. A new long distance bike with 26" wheels and bar-end shifters, positioned at the more rugged end of the touring market.

The Rapide series has been fully upgraded with all models now using double wall rims, stainless spokes and Shimano cables. To cater for the increase in 'school commuting', Rapide gets a new 24" wheel model called Dimension - an everyday bike aimed at 8-11 year olds. Last but not least, we've added a 14" wheel Scoot for taller or older beginner bike riders.

Something that hasn't changed is Ridgeback's aim to make shopping for a new bike as easy as possible. So whatever your riding style, we're sure you'll find a Ridgeback that's right for you in this year's brochure and online at [ridgeback.co.uk](http://ridgeback.co.uk).

# MAKING HISTORY

Since 1983 Ridgeback has been building bikes for UK riders and has an unmatched reputation for innovation and quality. From high performance flat bar and touring bikes to comfortable commuters and children’s bikes, Ridgeback leads the way. Toby Howes looks back at some of Ridgeback’s landmark bikes.

1983 : The first Ridgeback

2002 : Genesis Day 03

2003 : The Switch Storm

2006 : Dual Track Advance

2008 : Flight R25

2013 : Supernova XT

### In the beginning

Ridgeback launched the UK’s first mountain bike.

**Everyday cycling**

1990 saw the arrival of the Ridgeback Roxy, an early forerunner of today’s Rapide series – the benchmark by which all other commuter bikes are measured.

### Something totally new

In 2001 we created the flat bar road bike. Originally named Genesis, this new breed of fast commuter sports bike is seen as one of the last significant developments in cycle genres.

Despite having undergone significant evolution, Ridgeback’s award winning design continues today in the Flight series.

### Mountain or street bike?

Ridgeback’s Urban series was another trend setter. In 1998 these slick tyred, street mountain bikes were not only lots of fun to ride but provided a serious alternative to the more traditional commuting bike. Becoming the Switch series in 2003, they ran right up until last year.

### Big wheels keep on rolling

Other milestones include, Dual Track, a robust all rounder with 29” wheels aimed at riders looking for a more comfortable off-road experience. Originally designed as a mountain bike, today’s Dual track is more off-road hybrid than mtb.

Using 700c road rims instead of traditional 26 inch wheels, the Dual Track’s larger tyres give the bike a longer contact patch for improved traction whilst rolling over lumps and bumps more smoothly.

### 25th Anniversary

In 2008, to mark our 25th anniversary, the R25 was launched. This was a limited edition of one hundred very special flat bar road bikes. Based on a prototype bike I was riding at the time, the R25 was Ridgeback’s most advanced flat bar bike to date.

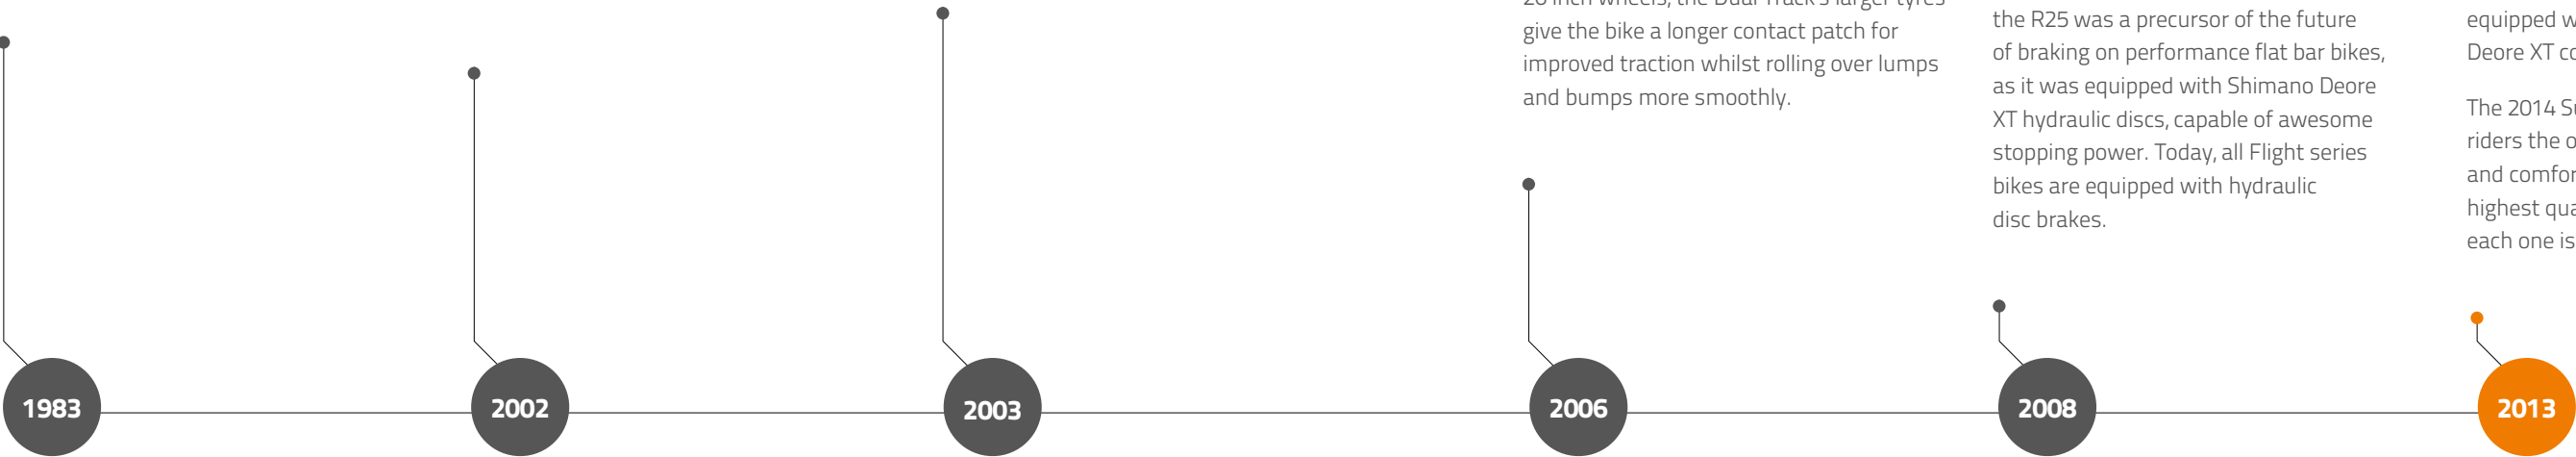

Five years on and it’s now clear that the R25 was a precursor of the future of braking on performance flat bar bikes, as it was equipped with Shimano Deore XT hydraulic discs, capable of awesome stopping power. Today, all Flight series bikes are equipped with hydraulic disc brakes.

### 30th Anniversary

It’s been 23 years since the launch of the Roxy. Our first ‘hybrid’ bike, the Roxy was a forerunner of the Rapide series, one of the most successful commuter bike ranges in the UK.

To celebrate Ridgeback’s 30th anniversary, this year’s Rapide series includes a limited edition Supernova equipped with Shimano’s premium level Deore XT componentry.

The 2014 Supernova XT offers fifty lucky riders the opportunity to own a practical and comfortable commuting bike of the highest quality. No two bikes are alike as each one is uniquely numbered 1 to 50.

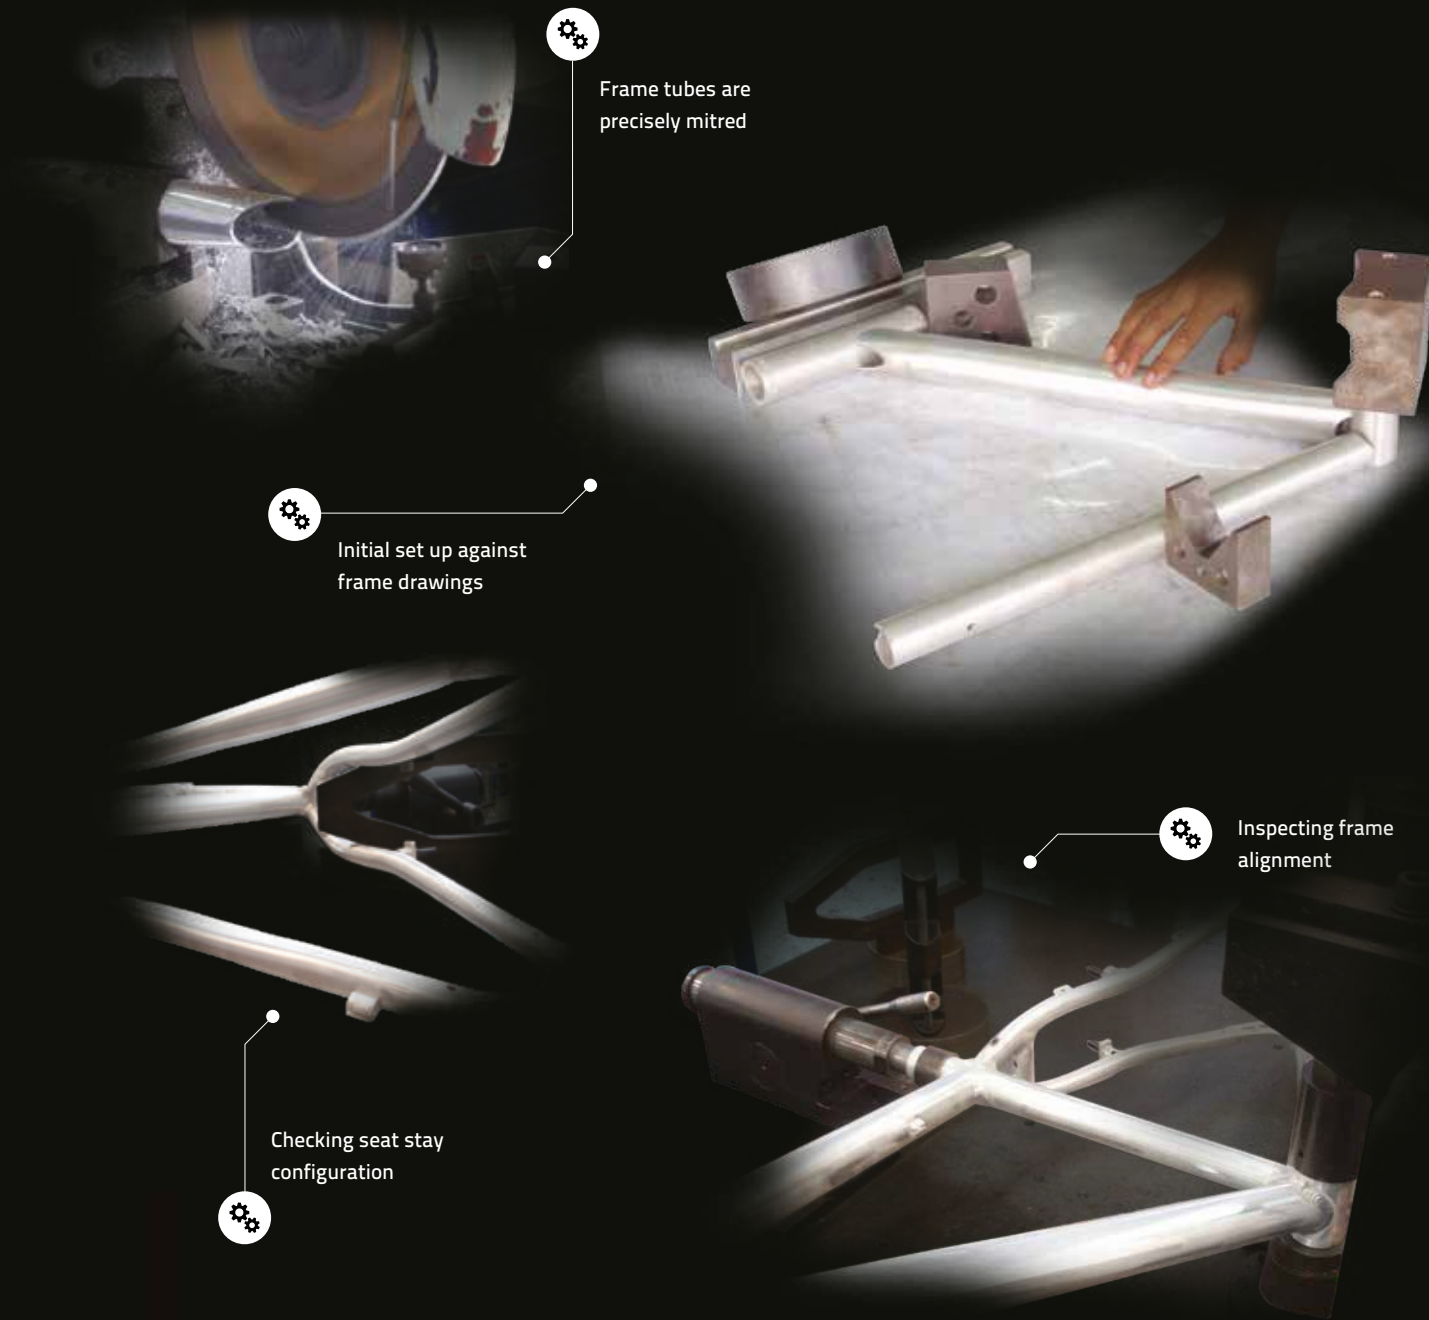

# FRAME TECH

Thanks to lighter weight aluminium and steel alloys the traditional bike frame has attained new levels of resilience and responsiveness. We can chose from many manufacturers' components to get the best set-up, but the frame has the greatest influence on ride feel. Luckily it's the component that can be most adapted to perform the way we need it to.

⚙️  
*Guaranteed for life*

All Ridgeback frames are designed to provide the best blend of performance, handling and ride quality. Meticulously constructed from lightweight aluminium or Reynolds steel, tube diameter and wall thickness are specified according to frame size and intended use.

Whilst similar parts specifications are common to many bike brands, Ridgeback frame geometries are designed to work with the forks, stems and

tyres, and relevant riding style to ensure that everything is in balance and working together to maximum advantage. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.

# ANATOMY OF A COMMUTER

## Frame

Built using lightweight aluminium or steel tubing, Ridgeback frames have a geometry designed for comfortable power output and confident handling. Constructed with generous tyre clearance as well as useful mudguard and rack fittings, a Ridgeback frame always provides a balanced blend of comfort and ride quality.

### Frame

Guaranteed for life

### Disk Brakes

Powerful all weather braking

## Disk Brakes

Perfect for regular city riding, hydraulic disc brakes have a safe, modulated lever feel and provide incredible stopping power in all conditions, especially in the wet, needing little adjustment as pad wear is low.

### Tyres

Practical puncture resistance

## Tyres

Continental and Schwalbe tyres are all about reliability. New technology has enabled the use of tougher yet lighter materials to radically reinforce tyres against intrusion from sharp objects. In simple language, whilst not yet a thing of the past, punctures are now few and far between.

## Shimano

Probably the most important name in cycling. While all brands use Shimano components to some degree, Ridgeback strives to use complete Shimano transmission systems where specifications allow to provide the highest level of shifting function and reliability.

### Shimano

Accurate shifting every time

# ANATOMY OF A COMMUTER

## Chris: Balerno to Edinburgh Quay

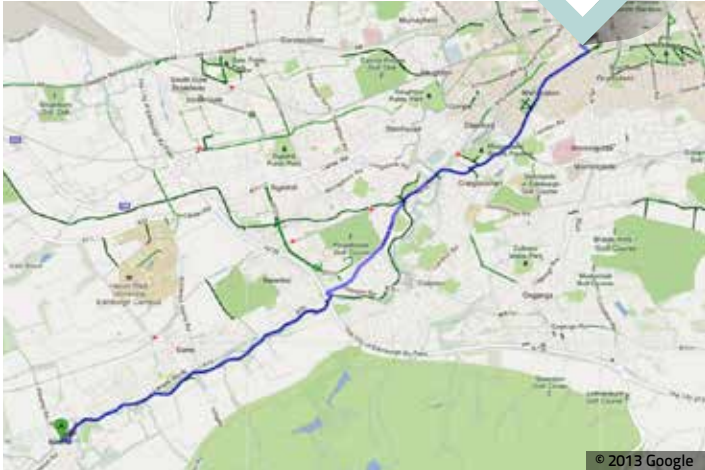

Until recently my ride was six miles but I've recently discovered a really tranquil towpath route and now the journey is closer to seven miles and takes about 10 minutes longer. It's worth it though as I prefer riding along beside the canal.

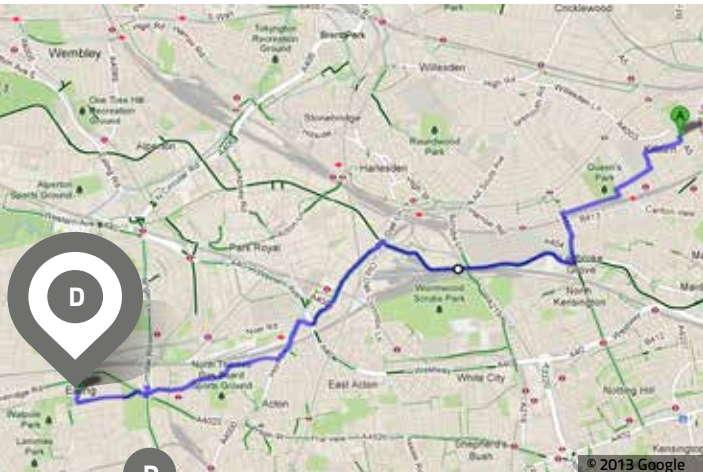

Model:  
Flight 03

- Ride frequency: 3 days per week
- Daily distance: 8 miles
- Average speed: 15 mph
- Ride time: 35 mins

Flight range page 38 - 47

## Vanessa: Kilburn to Ealing

Using main roads, it's a five mile commute to my practise, however I know lots of shortcuts and if I'm really going for it I can get my time down to less than 25 minutes. I've cycled regularly for five years now and don't think I'd ever go back to driving.

Model:  
Dual Track x2

- Ride frequency: 3 days per week
- Daily distance: 5 miles
- Average speed: 14 mph
- Ride time: 22 mins

Dual Track range page 66 - 73

## Stuart: Shoreham to Brighton

Riding along the seafront beats public transport every which way. Of course down here, the weather can be challenging but cycling is easily doable with the right clothing so I still manage to bike in most days.

Model: Velocity

- Ride frequency: 5 days per week
- Daily distance: 7 miles
- Average speed: 11 mph
- Ride time: 40 mins

# GO FURTHER

**R** A Ridgeback Rapide series bike offers **the perfect combination** of speed, comfort and practicality.

With the upright feel of a traditional bike, a Avenida series Ridgeback offers **easy shifting, great brake performance** and not too many gears.

**flight**

Quick and adaptable, a Ridgeback Flight **performs at the highest level** on city streets, in rugged urban conditions and even on light off-road trails.

**F**

Highly **versatile bikes for transport to training** and everything in between.

**A**

Long distance tourer, rugged commuter or just for day rides, a World series bike offers **a cycling experience steeped in history** but with the benefit of contemporary technology.

**W**

A robust all-rounder that's **self-assured on rough terrain** yet feels comfortably balanced on city streets and canal towpaths.

**D**

Off-road bikes **designed for durability and comfort.**

**T**

All Kid's Ridgebacks have a light aluminium frame that **allows a child to lift and handle their bike with ease.**

# Around town & weekends away

Adaptable and stylish with the durability needed for everyday use. A short test ride of one of these benchmark commuter hybrids will confirm why so many people choose a bike from this popular category.

With the strength of a mountain bike, road geometry and smooth rolling 700c wheels, the Rapide's sleek aluminium frame is built using size specific tubing for a responsive yet resilient ride.

Reliability is essential when a bike is used for daily transport. A full Shimano drivetrain ensures accurate and consistent shifting over time whilst Continental puncture resistant tyres make a significant contribution to many puncture free miles. Mudguard and rack fittings are standard on all Rapide models.

With wide ratio gearing, ergonomic triple density grips and a comfortable saddle, a Ridgeback Rapide is commute ready as well as being a practical and fun way to get around.

New to the range for 2014 is the Dimension. Aimed at eight to eleven year olds, it combines all the principles of the Rapide series with features designed specifically for smaller riders.

To celebrate Ridgeback's 30th Anniversary, this year's Rapide series includes a limited edition Supernova equipped with Shimano Deore XT. Each bike is uniquely numbered 1 to 50.

# Easy cycling

With the upright feel of a traditional town bike complimented by modern lightweight technology, comfort and low maintenance are the Avenida's priority.

Built to a high quality specification, an Avenida series Ridgeback offers easy shifting, great braking and either three or six gears. There's even a beautifully simple single speed model as well.

A light aluminium frame with a 'low standover height' unisex design allows easy mounting and dismounting for stability and safe handling.

A comfy saddle, suspension seat post and smooth rolling, puncture resistant tyres enhance the Avenida's luxurious feel.

## *The fastest way to work*

Quick and adaptable, a Ridgeback Flight performs at the highest level on city streets, in rugged urban conditions and even on light off-road trails.

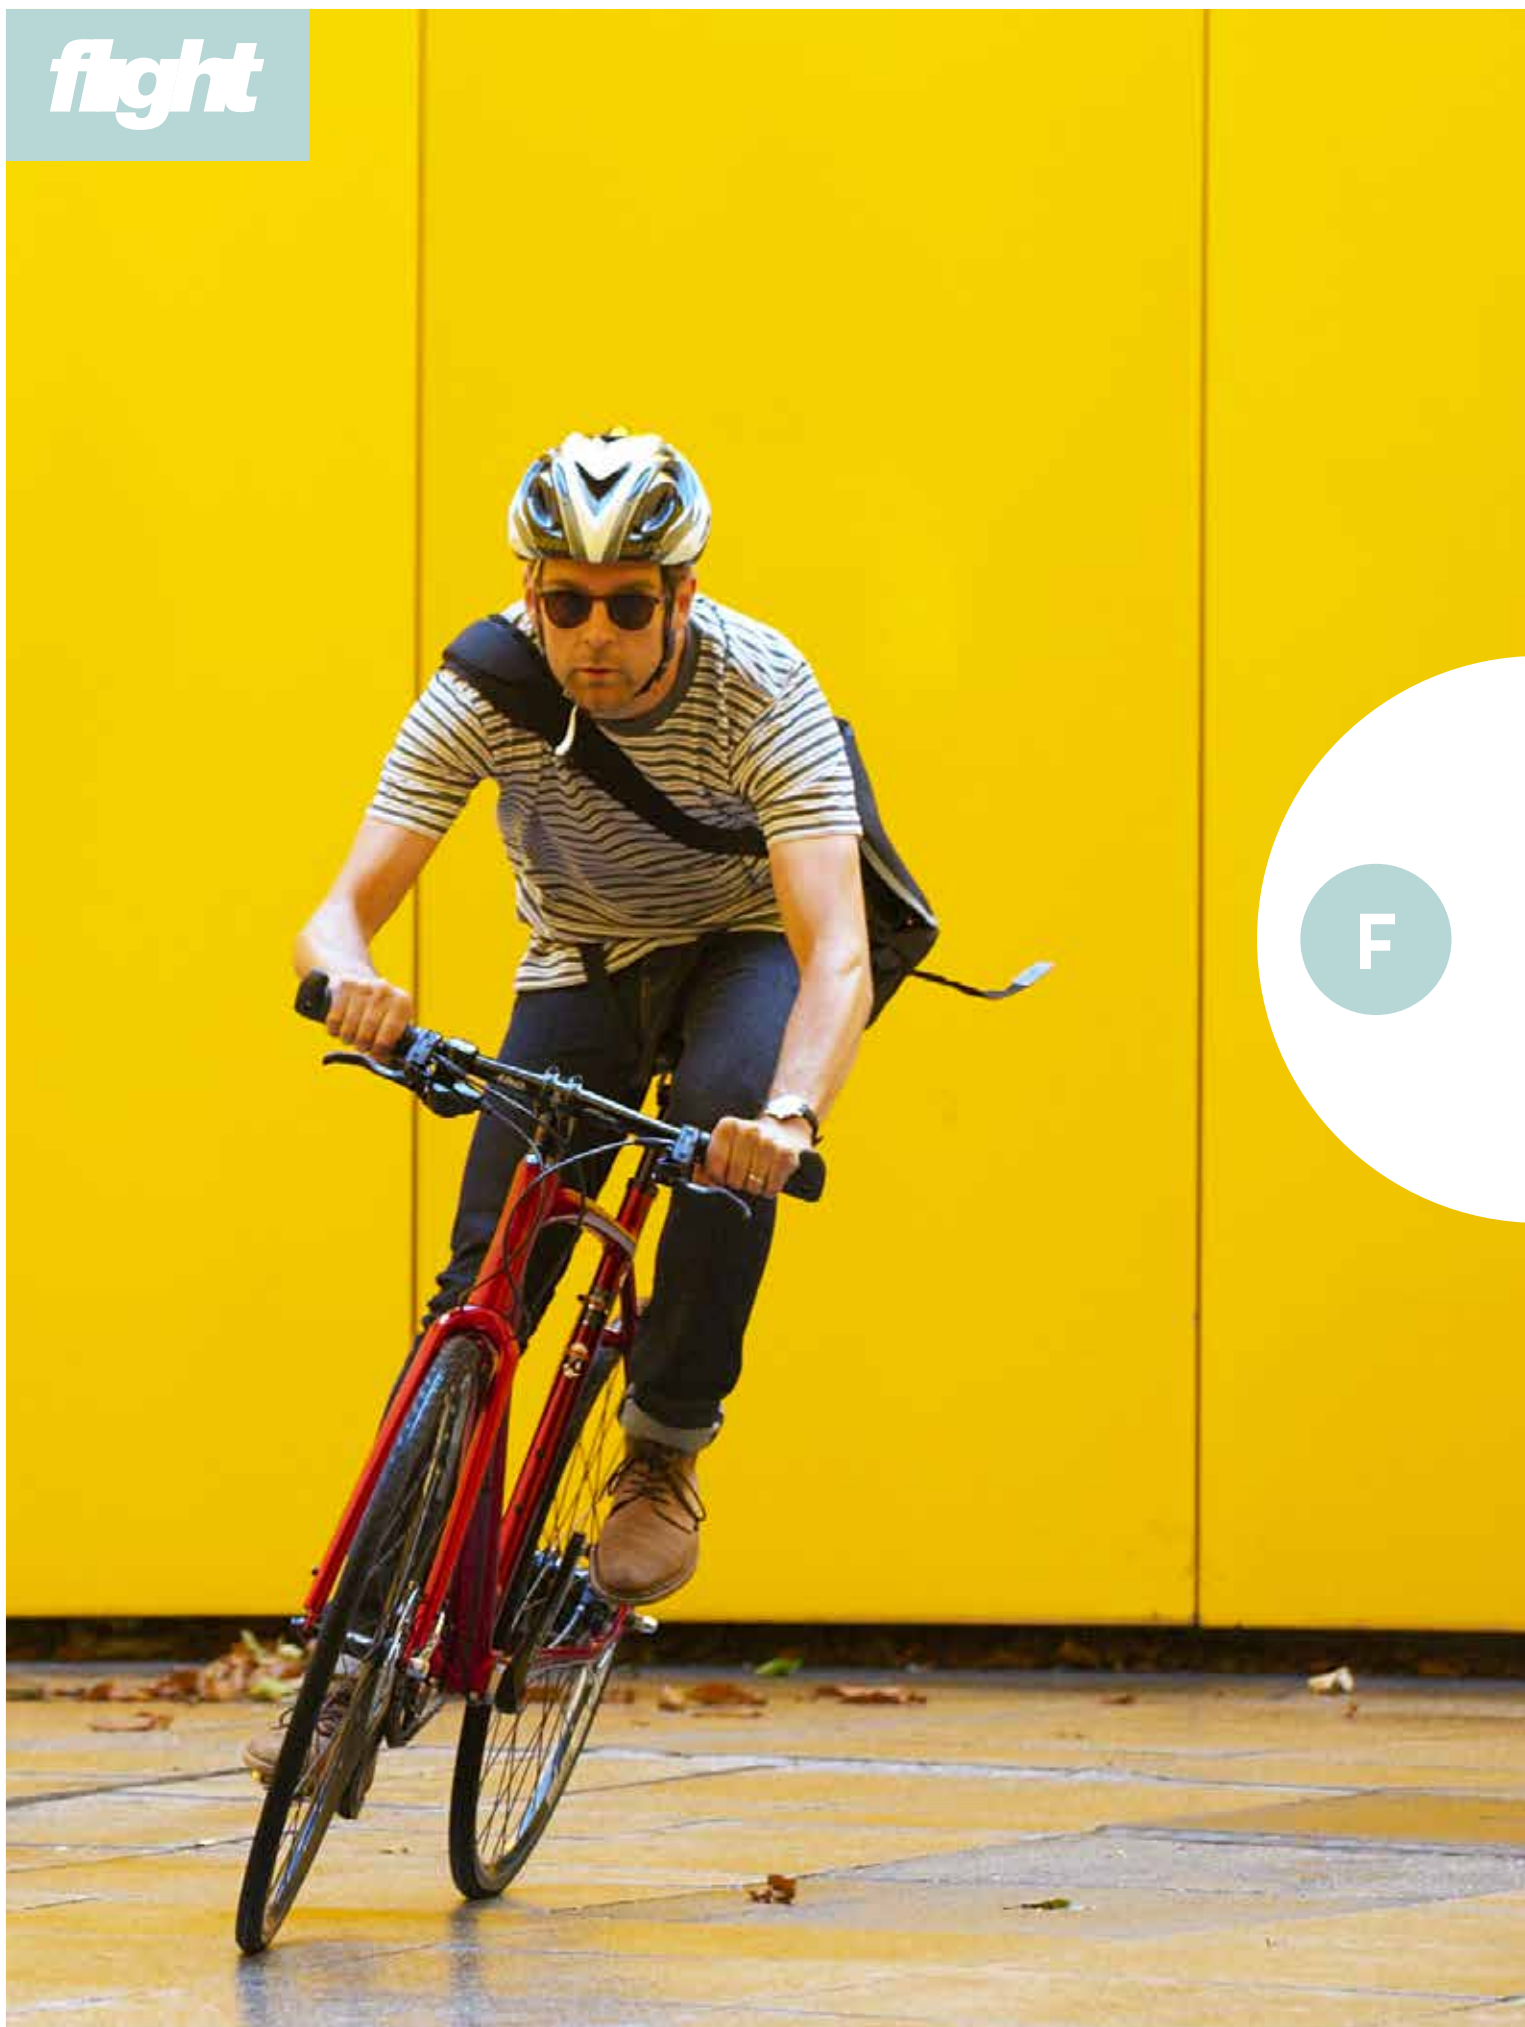

Designed for fast commuting, Flight bikes use robust 28c width Continental Contact puncture resistant tyres. However frames are built with enough clearance to take wider tyres if required, up to 37c.

All models except Flight 00 are fitted with hydraulic disc brakes. Perfect for regular city riding, they provide incredible stopping power in all conditions, especially in the wet, needing little adjustment as pad wear is low.

A wide ratio Shimano drivetrain with triple chainwheels provides a range of gears capable of coping with virtually any gradient and the inclusion of mudguard and rack fittings further underlines the commuter practicality of these exciting bikes.

# Comfortably quick

Agile commuter or responsive training bike, the Advance series provides nimble handling and rapid acceleration.

Based on a classic road bike layout, an Advance series Ridgeback is simply a more rugged version of the concept brought up to date with the necessary practicality for everyday use.

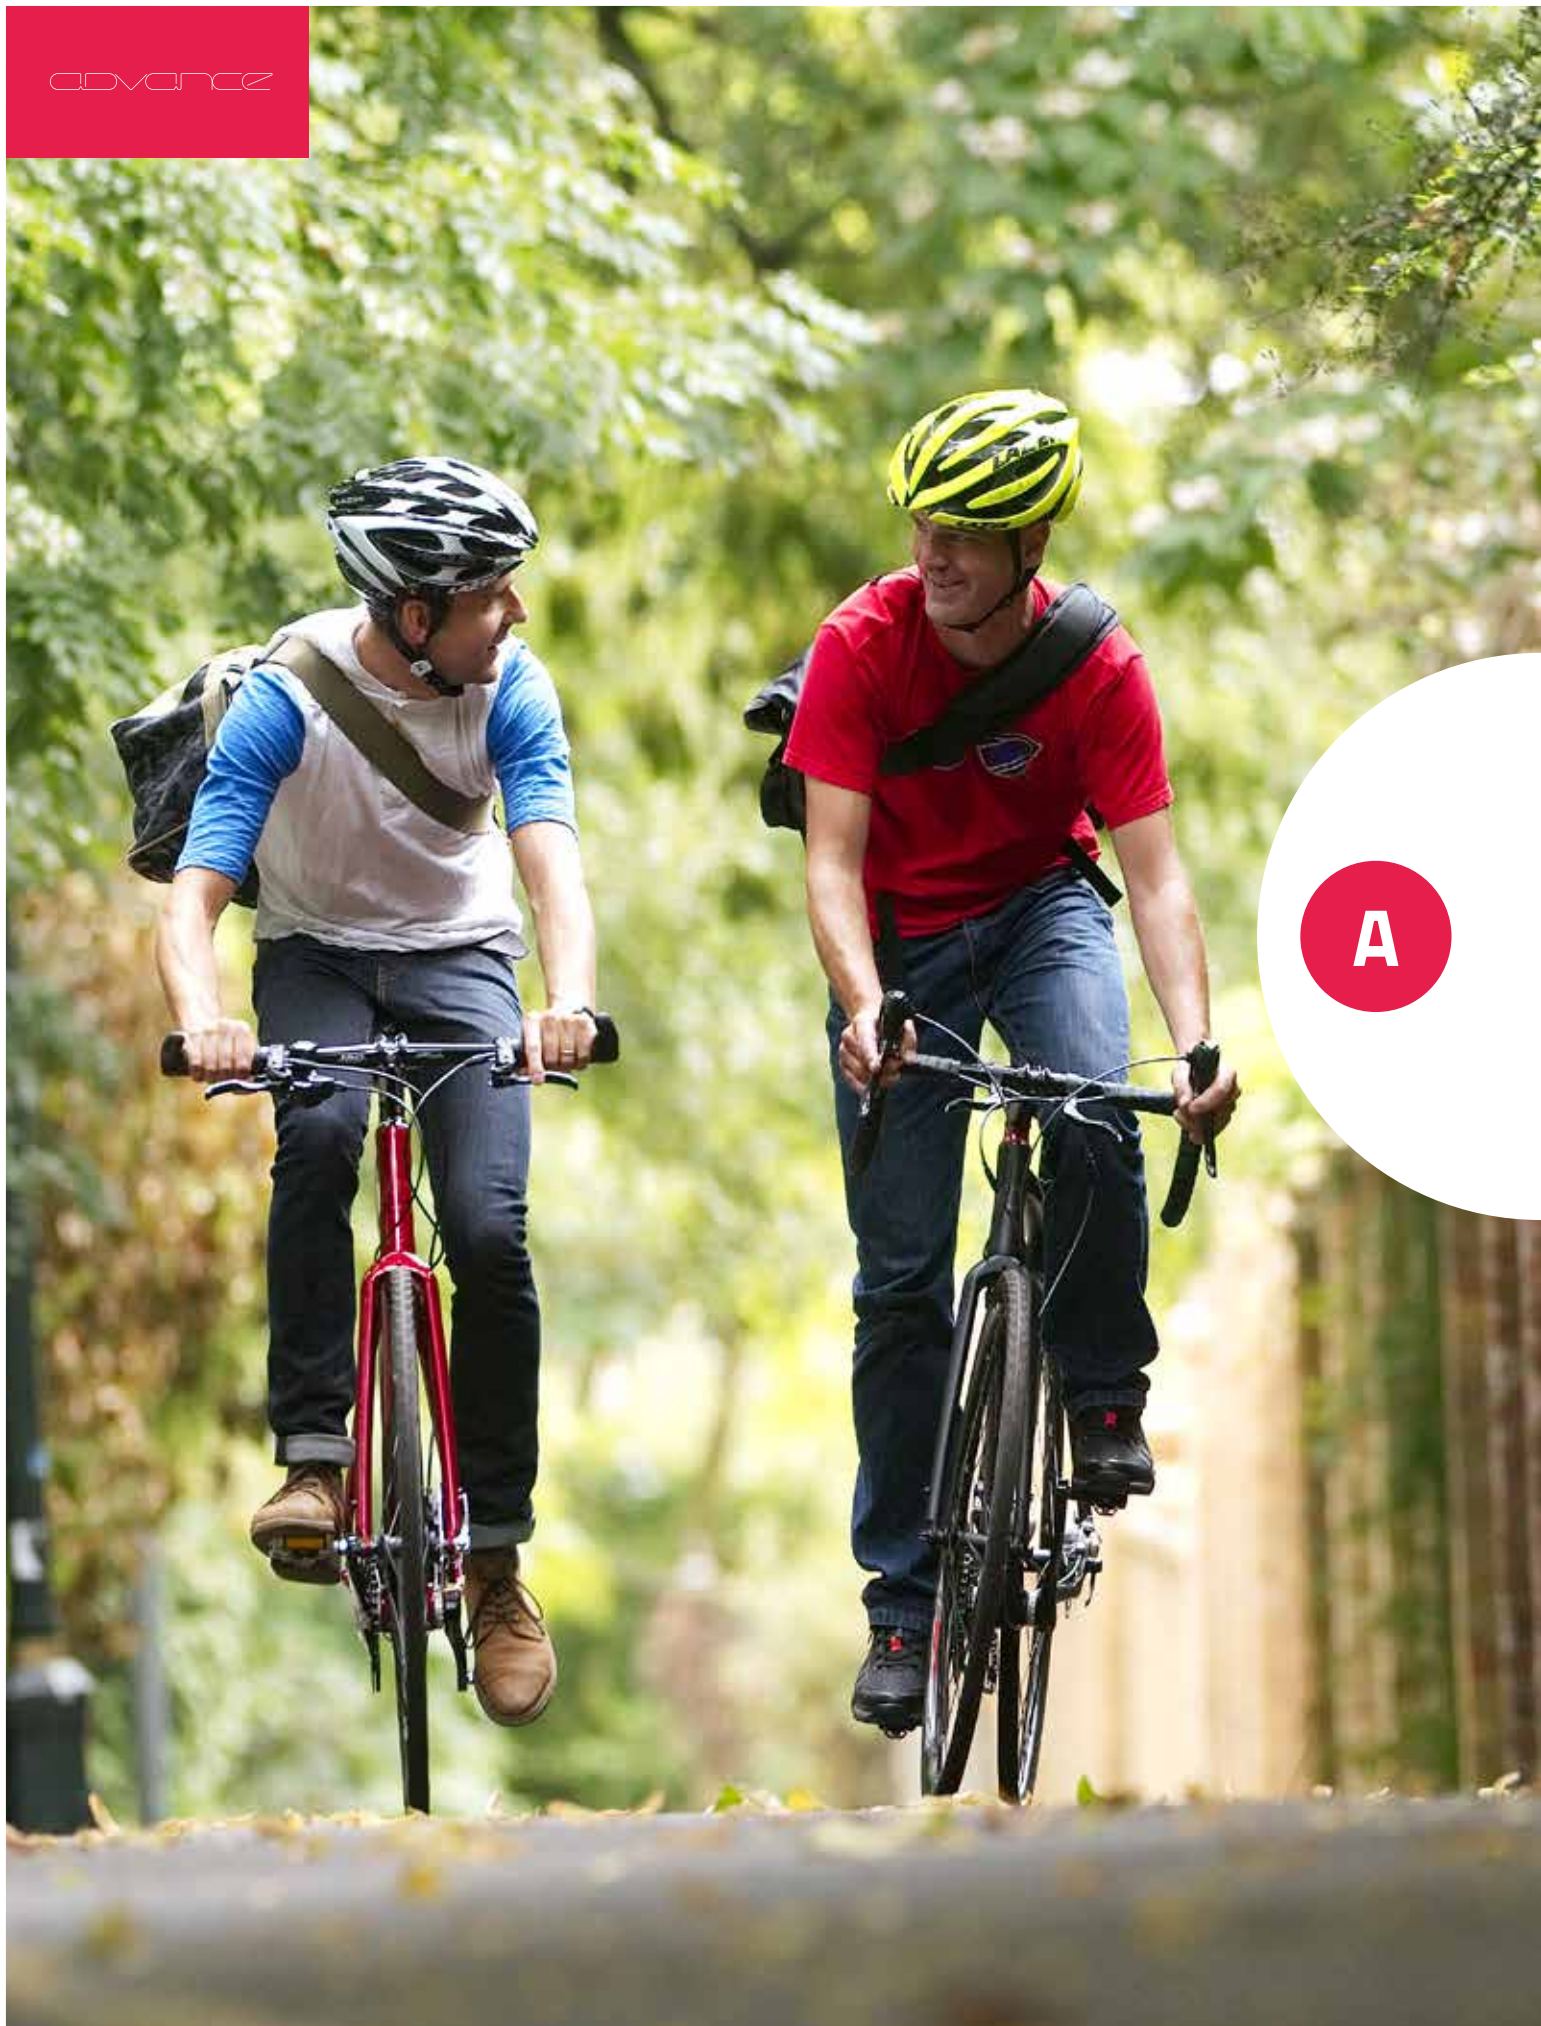

Constructed to a geometry designed for comfortable power output and confident handling, a Ridgeback Advance has generous clearance for 28c tyres as well as being specified with mudguard and rack fittings.

In keeping with recent trends in road bike design, both models are fitted with a compact shallow drop handlebar. A versatile alternative to straight bars, they offer a variety of positions to enhance longer distance comfort.

A Shimano triple chainset transmission, robust wheelset and Continental tyres complete the package.

# Explore distant places

Long distance tourer, rugged commuter or just for day rides, a Ridgeback World series bike offers a cycling experience steeped in history but with the benefit of contemporary technology.

Built to exacting specifications, frames are constructed to a size specific geometry in a wide range of seat tube lengths to ensure stability and sure handling, even when fully loaded. Hand welded using Reynolds steel or 6061 aluminium tubing ; a World series Ridgeback provides a responsive, comfortable ride with the structural reliability that's essential on a long distance touring bike.

Designed for long periods in the saddle in remote locations, World series bikes are sensibly specified. A square taper bottom bracket allows replacement with a simple readily available cup and axle unit, whilst brazed down tube cable stops mean traditional gear levers can be used if required.

All models are supplied with a sturdy four point aluminium rack and all but the Tour are fitted with a frame fit pump.

## Tarmac and Trail

A robust all-rounder that's self-assured on rough terrain yet feels comfortably balanced on city streets and canal towpaths.

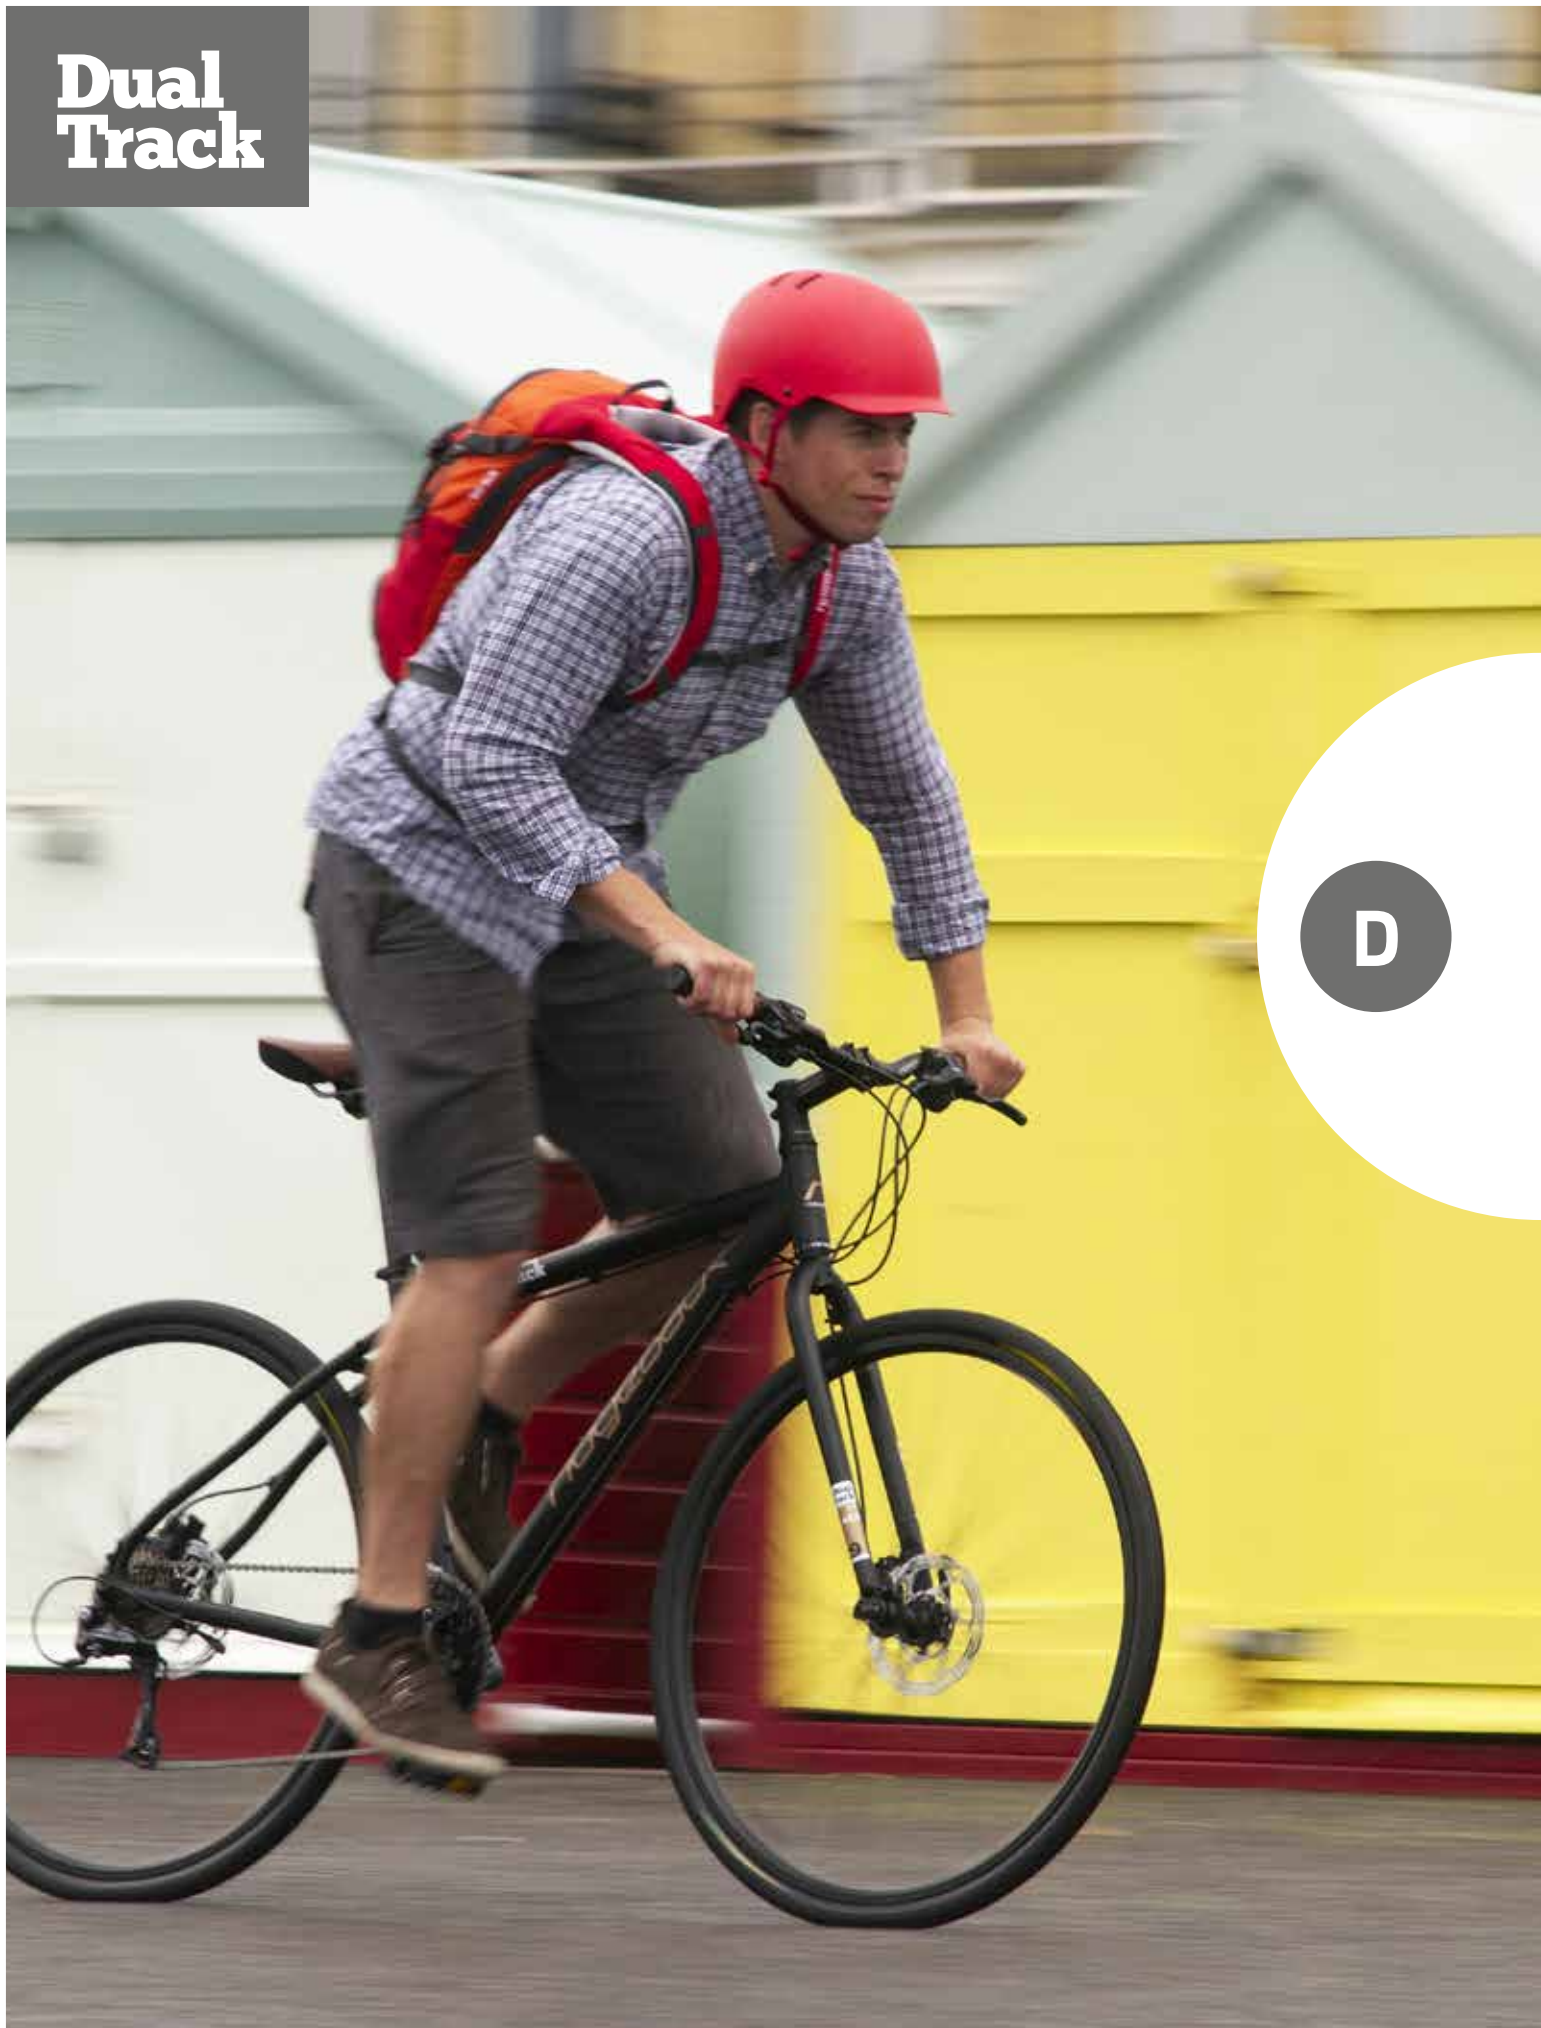

Dual Track has its roots in mountain biking but in reality the design is more off-road hybrid than mtb. Using 'road' rims instead of traditional 26 inch wheels, the Dual Track's 700c tyres provide improved traction whilst rolling over lumps and bumps more smoothly.

Specified with either a straight bladed Cro-Moly or SR suspension fork with hydraulic lock-out, all models use a 48 tooth triple chainset for fast road riding whilst having the additional benefit of wide ratio mountain bike gearing to cope with nature's undulations out on the trail.

Continental Cyclo-cross Speed tyres, triple density lock-on grips and a Kevlar reinforced saddle complete the package. Tough urban commuter and weekend off-roader, a Ridgeback Dual Track is the embodiment of the 700c wheel trail bike concept.

# Off the beaten track

Ridgeback mountain bikes are where it all began. The Terrain series line-up features six great bikes that ride with confidence-inspiring ease.

Using a classic single-track geometry, a Ridgeback mountain bike is reactive and intuitive, delivering big ride feel with front end comfort. The 602LX has a resilient steel fork whilst other models use SR suspension for enhanced shock absorption.

A triple chainset, wide ratio cassette and Shimano EZFire shifting make light work of the ups and downs out on the trail.

For more relaxed cycling the MXK offers the best of all worlds. A higher front end, adjustable handlebar stem and wide sprung saddle provide an upright riding position for great visibility and comfortable easy pedalling.

Built with go anywhere ability, a Terrain series Ridgeback is as strong as it is agile, whether negotiating a twisty single track or a enjoying a leisurely ride in the park.

## Real bikes not toys

A Ridgeback boy's bike is engineered to take the knocks and built to last.

Offering long term reliability and unbeatable value for money, the MX Terrain's robust, light aluminium frame makes it easy for a child to lift and handle their bike.

For six to nine and eight to eleven year olds who don't want suspension, the RX20 and RX24 are new models with a Hi-Ten steel fork.

To cater for eight to eleven year old riders who are looking for more of an everyday bike, a new model called Dimension can be found

on page 33. It combines all the principles of the Rapide series with features designed specifically for smaller riders.

From 12" to 24", every Ridgeback boy's bike is constructed to the same exacting standards as an adult bike and undergoes professional assembly and safety checking by qualified bicycle mechanics.

# Light, safe and easy to ride

Perfectly proportioned for comfort and control a Ridgeback girl's bike has a light aluminium frame with a gently curved top tube for a low stand-over height giving a feminine appearance.

Handlebar stem design allows easy adjustment as the child grows and a high quality saddle and soft grips complete the package.

For six to nine and eight to eleven year olds who don't want suspension, the Cherry and Serenity are new models with a Hi-Ten steel fork.

To cater for eight to eleven year old riders who are looking for more of an everyday bike, a new model called Dimension can be found

on page 32. It combines all the principles of the Rapide series with features designed specifically for smaller riders.

From Minny to Destiny, all Ridgeback girls' bikes are assembled to the same standard as an adult bike and undergo professional assembly and safety checking by qualified bicycle mechanics.

Stabilisers

😊 *Learning to balance within easy reach of the floor is a whole lot of fun.*

Balance is quickly learned without the distraction of pedalling and once mastered, it's then just a small step to move onto a bike with pedals but without the need for stabilizers. A rear brake helps those new to 'riding' with an early understanding of how to slow down.

Available in 12" and 14" wheel sizes to cater for beginners of varying heights, Scoot has a very high specification level including a lightweight alloy frame, alloy rims and semi slick tyres. The saddle incorporates a neat carry handle for those tired or tantrum moments and with full bearings throughout, domed wheel nuts as well as an alloy V-brake, there is no better beginner bike.

Light 6061 Aluminium frame

Easy carry-handle

SCOOT®

*The transition between walking, freewheeling and steering is simple.*

## Shimano Shoes

A good cycling shoe is a must for regular riding and if you want to go one step further, a clipless pedal and shoe combination is by far the most efficient system. With the widest range of cycling footwear in the world, Shimano offers 'SPD' (Shimano Pedalling dynamics) shoes and pedals for every riding style.

On-road, off-road. On or off the bike, Shimano shoes provide comfortable pedalling stability along with durability and a casual look.

**SHIMANO**

## Kryptonite Locks

Serious security is the only business Kryptonite is in. They are committed to providing innovative products to make sure that your bike remains where you left it. Kryptonite is a premier manufacturer of high-quality cables, chains, U-locks and flexible security systems for bicycles everywhere, wherever they are used, and wherever they are parked.

**KRYPTONITE**

**A** Get more out of cycling. A Ridgeback would not be complete without products to enhance the experience. Here are some recommendations to keep you safe, maintain your bike and if you have children, allow them to enjoy it with you. For more information, please visit [madison.co.uk](http://madison.co.uk)

## Madison Clothing

Madison clothing offers a range of the essential cycle clothing for all riders, with a wide range of sizes, shapes, and prices. The benefits come from improved comfort on the bike, and although all levels of rider will benefit from using a few items of specialist clothing, it is the occasional rider who will feel the biggest benefit.

**MADISON**

## Lazer helmets

With over 90 years of experience Lazer is one of the most innovative helmet companies in the world.

Lazer's award winning Rollsys system permits accurate and progressive peripheral sizing adjustment by simply turning a small adjuster on the top of the helmet. The fit of the helmet is symmetrically tightened up with a simple one-handed adjustment without creating any pressure points on the head.

Lazer helmets offer a great combination of performance, value for money and style.

**LAZER**

## Truflo

Truflo has been producing effective and good value cycle pumps since the 1980s. All Truflo pumps are strongly constructed and attractively styled, and provide reliable performance at high pressures and high volumes. Whether it's a floor pump to make light work of weekly top ups or a mini pump carried for emergencies, a good pump is indispensable. The Truflo range offers pumps for every situation.

**TRUFLO**

## Park Tools

Park Tool has been manufacturing bicycle-specific tools since 1963, and is the world's largest bicycle tool manufacturer. A long-term dedication to quality, innovation, and customer service has made Park Tool the first choice of professional and home bicycle mechanics around the world: whatever the task, you can rely on Park Tool to provide the right tool for the job.

**electron.**  
bright ideas

## Electron Lights

Electron lighting systems use the latest technologies and designs to offer exceptional performance and durability. The Electron range meets the needs of all types of riders and includes some outstanding products for situations where battery life and performance are of prime concern. From high power LED front lamps to micro-sized backup lights Electron has it covered, so take a look at the range and see what the latest lighting technology has to offer.

1988 **FINISH LINE** 2013  
YEARS

## Finish Line Lubricants

Everything you need to keep your bike running and looking like new. Since 1988, Finish Line has been proud to offer the best selling, highest quality, bicycle-specific care products available. Take a look at how they can help make your bike easier to pedal, shift better, and last longer. Finish Line Wet Lube is a long lasting and highly water resistant lube and offers proven performance on tours, in muddy off-road conditions and on long rainy commutes.

## Bobike Childseats

Child seats are a great way to enjoy cycling with the youngest member of the family, and are an important first step to introducing the joys of cycling to the next generation.

With innovative designs, extensive research and development as well as rigorous endurance testing, Bobike child seats meet EN and TUV safety standards and provide children from nine months to 10 years old with optimum protection and seating comfort.

# Ridgeback connected

Keep updated with news, send us feedback and find your nearest dealer.

[ridgeback.co.uk](http://ridgeback.co.uk)

### Find a bike and check the spec ...

Complete information on each bike including weight, geometry and standover height.

### Compare models ...

Search by series or model and use the compare feature to show side by side comparison of two bikes.

### Find a local dealer ...

A Ridgeback dealer offers complete advice and provides first class after sales service, as well as a free 30 day tune up. Because a bike is a safety critical product, we always recommend collecting your bike in person from an authorised Ridgeback stockist.

### Have your say ...

Rider response is essential. Let us know what you think of your Ridgeback and see what other owners have to say. Just click on Feedback. Or if you have a question, use Contact.

### News, advice and comment ...

Blog format news, stories and information.

### Pedal for the planet ...

For every Ridgeback sold, a donation is made to organisations promoting the use of bicycles. Bikes and riding preserve our environment. By making cycling our first choice transport, we can all help to ensure our planet is still a great place to ride in the years to come.

### Price and Specification ...

Prices include VAT at current rate and are correct at time of printing. We reserve the right to revise SRP and specification without notice. Please check on-line for current SRP and specification.

### Guaranteed for life ...

Ridgeback means quality. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.

DISTRIBUTED IN THE UK AND IRELAND BY  
**S SPORTLINE**

Ridgeback is distributed in the UK and Ireland by Sportline, Roebuck Way, Knowlhill, Milton Keynes, Bucks MK5 8HL. Tel: 0870 034 7226 / Email: [contact@ridgeback.co.uk](mailto:contact@ridgeback.co.uk)
