2014/15 Get Cycling

Cycling. It's a healthy activity, it's an efficient way to get around and it provides a unique freedom that other modes of transport just can't offer. At Ridgeback we continue to look at everything cycling to make sure each new range meets the varied needs of today's cyclists.

The big news for this year is that Rapide has become a brand in its own right. Recognising the significant demand for quality road bikes, Rapide enjoys a heritage dating back to the nineties when the name was originally used by Ridgeback for its road bike series. Rapide today offers an exciting range of carbon & aluminium models as well as 24" and 26" wheel junior bikes. Take a look. rapidebikes.co.uk

Previously named Rapide, our best-selling commuter bike line up is now called Metro. For 2015, there are subtle changes to frame geometry and we've added hydraulic disc brakes on higher models.

T Toby Howes
Head of Product Design

The lightweight children's Dimension series is expanded to six options and now includes a 20" wheel bike for 5-8 years olds. Dimension is perfect for going to school and everyday cycling.

If you're looking for a upright women's bike, checkout Tradition. It's a light aluminium version of the classic sit up and beg bikes of yesteryear.

Lastly, we've merged the Terrain mountain bikes with Dual Track to create one clearly defined off-road series. With go anywhere ability, they're tremendous fun for light off-road trail riding.

Whatever your riding style, we're sure you'll find a Ridgeback that's right for you and once you've found the one that meets your needs, check out your nearest stockist at ridgeback.co.uk, go along and test it for yourself.

Making history

Since 1983 Ridgeback has been building bikes for UK riders and has an unmatched reputation for innovation and quality. From high performance flat bar and touring bikes to comfortable commuters and children's bikes, Ridgeback leads the way. Toby Howes looks back at some of Ridgeback's landmark bikes.

2010

The first Ridgeback

In the beginning

Ridgeback launched the UK's first mountain bike.

Everyday cycling

1990 saw the arrival of the Ridgeback Roxy, an early forerunner of today's Metro series - the benchmark by which all other commuter bikes are measured.

Genesis Day 03

Something totally new

In 2001 we created the flat bar road bike. Originally named Genesis, this new breed of fast commuter sports bike is seen as one of the last significant developments in cycle genres.

Despite having undergone significant evolution, Ridgeback's award winning design continues today in the Flight series.

Switch Storm

Mountain or street bike?

Ridgeback's Urban series was another trend setter. In 1998 these slick tired, street mountain bikes were not only lots of fun to ride but provided a serious alternative to the more traditional commuting bike. Becoming the Switch series in 2003, they ran right up until 2012.

Dual Track Advance

Big wheels keep on rolling

Other milestones include, Dual Track, a robust all rounder with 29" wheels aimed at riders looking for a more comfortable off-road experience. Originally designed as a mountain bike, today's Dual track is more off-road hybrid than mtb.

Using 700c road rims instead of traditional 26 inch wheels, the Dual Track's larger tyres give the bike a longer contact patch for improved traction whilst rolling over lumps and bumps more smoothly.

Flight R25

25th Anniversary

In 2008, to mark our 25th anniversary, the R25 was launched. This was a limited edition of one hundred very special flat bar road bikes. Based on a prototype bike I was riding at the time, the R25 was Ridgeback's most advanced flat bar bike to date.

Five years on and it's now clear that the R25 was a precursor of the future of braking on performance flat bar bikes, as it was equipped with Shimano Deore XT hydraulic discs, capable of awesome stopping power. Today, all Flight series bikes are equipped with hydraulic disc brakes.

Supernova XT

30th Anniversary

It's been 24 years since the launch of the Roxy. Our first 'hybrid' bike, the Roxy was a forerunner of the Metro series, one of the most successful commuter bike ranges in the UK.

To celebrate Ridgeback's 30th anniversary, last year's Metro series includes a limited edition Supernova equipped with Shimano's premium level Deore XT componentry.

The 2014 Supernova XT offered fifty lucky riders the opportunity to own a practical and comfortable commuting bike of the highest quality. No two bikes were alike as each one was uniquely numbered 1 to 50.

Frame Tech

Thanks to lighter weight aluminium and steel alloys the traditional bike frame has attained new levels of resilience and responsiveness. We can chose from many manufacturers' components to get the best set-up, but the frame has the greatest influence on ride feel. Luckily it's the component that can be most adapted to perform the way we need it to.

Guaranteed for life

All Ridgeback frames are designed to provide the best blend of performance, handling and ride quality. Meticulously constructed from lightweight aluminium or Reynolds steel, tube diameter and wall thickness are specified according to frame size and intended use.

Whilst similar parts specifications are common to many bike brands, Ridgeback frame geometries are designed to work with the forks, stems and tyres, and relevant riding style to ensure that everything is in balance and working together to maximum advantage.

Frame tubes are precisely mitred

Initial set up against frame drawings

Checking seat stay configuration

Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.

Inspecting frame alignment

Designed for commuting

Disc Brakes

Perfect for regular city riding, hydraulic disc brakes have a safe, modulated lever feel and provide incredible stopping power in all conditions, especially in the wet, needing little adjustment as pad wear is low.

Frame

Built using lightweight aluminium or steel tubing, Ridgeback frames have a geometry designed for comfortable power output and confident handling. Constructed with generous tyre clearance as well as useful mudguard and rack fittings, a Ridgeback frame always provides a balanced blend of comfort and ride quality.

Shimano

Probably the most important name in cycling. While all brands use Shimano components to some degree, Ridgeback strives to use complete Shimano transmission systems where specifications allow to provide the highest level of shifting function and reliability.

Tyres

Continental and Schwalbe tyres are all about reliability. New technology has enabled the use of tougher yet lighter materials to radically reinforce tyres against intrusion from sharp objects. In simple language, whilst not yet a thing of the past, punctures are now few and far between.

Go by Bike

Against a backdrop of blue sky and sunshine, riding to work on a crisp, clear autumn morning is a great reminder of what a simple pleasure cycling can be. Whilst the experience can be enhanced with some specialist gear, all you really need to get started is a bike.

For a relatively small outlay the benefits are many. As well as improved health and offering a cost-effective alternative to high fuel and ticket prices, riding a bike allows you to accurately manage your journey time. It's fast, efficient and provides freedom that other modes of transport just can't offer.

Flight range page 43 - 50

flight

Chris
Balerno to Edinburgh Quay

Model : Flight 4.0

	Ride frequency:	3 days per week
	Daily distance:	8 miles
	Average speed:	15 mph
	Ride time:	35 mins

Until recently my ride was six miles but I've recently discovered a really tranquil towpath route and now the journey is closer to seven miles and takes about 10 minutes longer. It's worth it though as I prefer riding along beside the canal.

Metro range page 13 - 32

metro

Aga
Acton to Notting Hill

Model : Metro Speed

	Ride frequency:	3 days per week
	Daily distance:	4 miles
	Average speed:	11 mph
	Ride time:	22 mins

My office is about a four mile ride away but I know lots of shortcuts and if I'm really going for it I can get my time down to less than 20 minutes. I've cycled regularly for five years now and don't think I'd ever go back to driving.

Advance range page 51 - 58

advance

Ian
Worthing to Littlehampton

Model : Advance 7.0

	Ride frequency:	5 days per week
	Daily distance:	7 miles
	Average speed:	11 mph
	Ride time:	40 mins

Riding along the seafront beats public transport every which way. Of course down here, the weather can be challenging but cycling is easily doable with the right clothing so I still manage to bike in most days.

Go Further

metro

A Ridgeback Metro series bike offers the perfect combination of **speed, comfort and practicality**.

AVENIDA

A stylish solution for people on the move. An Avenida series Ridgeback offers easy shifting, **plush comfort and not too many gears**.

TRADITION

A Ridgeback Tradition is light, comfortable and is **fundamentally fab transport** that feels as cool as it looks.

flight

Quick and adaptable, a Ridgeback Flight **performs at the highest level** on city streets, in rugged urban conditions and even on light off-road trails.

ADVANCE

Highly **versatile bikes for transport to training** and everything in between.

World

Long distance tourer or rugged commuter, a World series bike offers **a cycling experience steeped in history** but with the benefit of contemporary technology.

Dual Track

Off-road bikes with **multi terrain capability**, Dual Track doubles as a highly capable urban commuter.

dimension

All the principles of a Metro series hybrid with a specification **designed specifically for smaller riders**, a Ridgeback Dimension is ideal for younger riders who cycle more frequently.

MX TERRAIN Girls SCOOT

All Kids' Ridgebacks have a light aluminium frame that **allows a child to lift and handle their bike with ease**.

Riders say... "A great all rounder for getting to work but just as good on country rides. Well built and solid."

metro

Around town & weekends away

For many years called Rapide, the Metro series is adaptable and stylish with the durability needed for everyday use. A short test ride of one of these benchmark commuter hybrids will confirm why so many people choose a bike from this popular category.

With the strength of a mountain bike, road geometry and smooth rolling 700c wheels, the Metro's sleek aluminium frame provides a responsive yet resilient ride.

New for 2015; from Velocity upwards, an adjustable Ahead stem is fitted in conjunction with a higher front end frame design for a sportier appearance without sacrificing the option of a more upright riding position.

The inclusion of hydraulic disc brakes on some models enhances safety by providing incredible stopping power in all conditions.

With wide ratio Shimano gearing, puncture resistant tyres and ergonomic triple density grips, a Ridgeback Metro is commute ready as well as being a practical and fun way to get around town.

TRADITION

Elegance & Style

The new Tradition is a prime example of taking a classic design, making it better but without losing any of the original charm.

With a distinctive high at the front design, a long stainless steel stem and a swept back riser bar, the Tradition puts the rider within easy reach of the controls and offers a quintessential upright cycling experience.

Specified with straightforward low maintenance technology, the Tradition's characteristically compliant ride has been further enhanced by Schwalbe puncture resistant balloon tyres.

With the riding position of an old-fashioned town bike, a Ridgeback Tradition is light, comfortable and provides fundamentally fab transport that feels as cool as it looks.

Riders say... " My Tradition is much lighter than I expected and the high rise stem and swept back bars give me a great view of the scenery. Love the colour too! "

flight

The fastest way to work

Riders say... "I really love my Flight 4.0. I've enjoyed riding it almost daily for a year and I've done more than 4,000 miles. "

Quick and adaptable, a Ridgeback Flight performs at the highest level on city streets, in rugged urban conditions and even on light off road trails.

Designed for fast commuting, Flight bikes are fitted with Continental Cyclocross Speed tyres for optimum comfort and grip.

Perfect for regular city riding, hydraulic disc brakes provide incredible stopping power in all conditions, especially in the wet, needing little adjustment as pad wear is low.

A wide ratio Shimano drivetrain with triple chainwheels provides a range of gears capable of coping with virtually any gradient and the inclusion of mudguard and rack fittings further underlines the commuter practicality of these exciting bikes.

Riders say... "I've owned a Ridgeback road bike since 2009 and continue to be very pleased with its reliability. On a recent 300km Sportive ride it performed faultlessly, leaving me to soak up the miles in great comfort."

ADVANCE

Tarmac & Trail

Agile commuter or comfortable training bike, a Ridgeback Advance offers nimble handling and quick acceleration.

Based on a classic road bike layout, an Advance series Ridgeback is simply a more rugged version of the concept brought up to date with added practicality for everyday use.

Constructed to a geometry designed for comfortable power output and confident handling a Ridgeback Advance has generous tyre clearance as well as being specified with mudguard and rack fittings.

In keeping with recent trends in road bike design, both models are fitted with a compact shallow drop handlebar. A versatile alternative to straight bars, they offer a variety of positions to enhance longer distance comfort.

A Shimano triple chainset transmission, robust wheelset and Continental tyres complete the package.

World

Voyage of discovery

Long distance tourer, rugged commuter or just for day rides, a Ridgeback World series bike offers a cycling experience steeped in history but with the benefit of contemporary technology.

Built to exacting specifications, frames are constructed to a size specific geometry in a wide range of seat tube lengths to ensure stability and sure handling, even when fully loaded. Hand welded using Reynolds steel tubing or 6061 aluminium; a World series Ridgeback provides a responsive, comfortable ride with the structural reliability essential for a traditional expedition bike.

Designed for long periods in the saddle in remote locations, World series bikes are sensibly specified. Braze down tube cable stops mean traditional gear levers can be used if required and all models except Panorama Deluxe use a square taper bottom bracket to allow replacement with a simple, more readily available cup and axle unit.

All models are supplied with a sturdy four point aluminium rack and all but the Tour are fitted with a frame fit pump.

Dual Track

Tracks & Trails

A robust all-rounder that's self-assured on rough terrain yet feels comfortably balanced on urban streets and canal towpaths.

Reactive and intuitive, 26" wheel models use a classic single-track geometry for big ride feel and front end comfort.

Sometimes referred to as a 29'er, the x1 and x3 have their roots in mountain biking but in reality the design is more off-road hybrid than mtb. The larger 700c tyres give the bike a longer contact patch for improved road speed whilst rolling over lumps and bumps more smoothly.

Specified with either a straight bladed steel or SR suspension fork, all models use a 48 tooth triple chainset for fast tarmac riding whilst having the additional benefit of wide ratio mountain bike gearing to cope with nature's undulations out on the trail.

Built with go anywhere ability, a Ridgeback Dual Track is as strong as it is agile whether negotiating a twisty single track or enjoying a leisurely ride in the park.

Riders say... "I continue to use my Dual Track X3 for commuting and occasional off-road rides. It has wide ratio gears and very good brakes! This is my third Ridgeback and as usual I've no complaints."

A wide ratio Shimano drivetrain with triple chainwheels provides a range of gears capable of coping with virtually any gradient

dimension

Freedom & Adventure

For 5-11 year olds who need an everyday bike that's lighter and more versatile than an mtb, a Dimension series Ridgeback combines the principles of a Metro hybrid with a specification and features specifically designed for smaller riders.

Completely re-designed for 2015, Dimensions are available with a 20" and 24" wheel and combine a triple butted alloy frame with lightweight and robust components designed for regular use.

As well as a Shimano cassette hub, stainless spokes and Ryde alloy rims, the Dimension has an all-aluminium parts mix to ensure its weight remains low.

Both bikes are equipped with ergonomically correct crank lengths, adjustable quill stem, appropriate width handlebar, twistgrip controls and reach adjustable brake levers.

With a high quality specification to provide the necessary durability to allow the bike to be passed on to a second child, a Ridgeback Dimension is ideal for younger riders who cycle more frequently.

Riders say... "Now there's a bike shed at school we knew our son would want to ride more regularly. Our local shop recommended a Ridgeback Dimension for being light and having practical tyres. They weren't wrong. Two months later the bike is in almost daily use and our son seems to be out on it all the time now .

Riders say... "The MX24 'boys' bike which I bought for my daughter is absolutely amazing. It's very well designed, well built and she adores it. Kid's bikes were never like this when I was a child. I have a really old mountain bike and I'm deeply jealous. "

[MX TERRAIN]

Real bikes not toys

A Ridgeback boy's bike is engineered to take the knocks and built to last.

Offering long term reliability and unbeatable value for money, the MX Terrain's robust, light aluminium frame makes it easy for a child to lift and handle their bike.

For six to nine and eight to eleven year olds who don't want suspension, the RX20 and RX24 are fitted with a Hi-Ten steel fork.

To cater for six to eleven year old riders who are looking for more of an everyday bike, the Dimension series can be found on page 81. It combines all the principles of the Metro series with features designed specifically for smaller riders.

From 12" to 24", every Ridgeback boy's bike is constructed to the same exacting standards as an adult bike and undergoes professional assembly and safety checking by qualified bicycle mechanics. Please go online for weights, stand-over height and other information.

and easy
to ride

Perfectly proportioned for comfort and control a Ridgeback girl's bike has a light aluminium frame with a gently curved top tube for a low stand-over height and feminine appearance.

Handlebar stem design allows easy adjustment as the child grows and a high quality saddle and soft grips complete the package.

For six to nine and eight to eleven year olds who don't want suspension, the Cherry and Serenity are fitted with a Hi-Ten steel fork.

To cater for six to eleven year old riders who are looking for more of an everyday bike, the Dimension series can be found on page 81. It combines all the principles of the Metro series with features designed specifically for smaller riders.

From Minny to Destiny, all Ridgeback girls' bikes are assembled to the same standard as an adult bike and undergo professional assembly and safety checking by qualified bicycle mechanics.

Destiny

£ 249.99

Alloy brakes and levers
Shimano 21spd gears
Aluminium hubs

SR XCT suspension

Harmony

£ 229.99

Aluminium hubs
Shimano 6spd gears
SR M3010A suspension

Serenity

£ 239.99

Diamond file comfort grips
Comfy riser handlebars
Steel fork

Shimano
21spd gears

Cherry

£ 219.99

Comfy riser handlebars
Light aluminium frame
Steel Fork

Melody

£ 149.99

- Diamond file comfort grips
- Light aluminium frame

Honey

£ 139.99

- Alloy V-brakes
- Comfy riser handlebars

Melody

£ 149.99

- Stabilisers
- Alloy seat post

Minnny

£ 129.99

- Light aluminium frame
- Alloy V-brakes

Scoot

£ 99.99

Learning to balance within easy reach of the floor is a whole lot of fun

S

SCOOT®

Balance is quickly learned without the distraction of pedaling and once mastered, its then just a small step to move onto a bike with pedals but without the need for stabilizers. A rear brake helps those new to 'riding' with an early understanding of how to slow down.

Available in 12" and 14" wheel sizes to cater for beginners of varying heights, Scoot has a very high specification level including a lightweight alloy frame, alloy rims and semi slick tyres. The saddle incorporates a neat carry handle for those tired or tantrum moments and with full bearings throughout, domed wheel nuts as well an alloy V-brake, there is no better beginner bike.

Scoot XL

£ 259.99

 Easy seat adjustment

Riders say... "We gave our son a Scoot for his third birthday and it was the best thing we could have done to get him started on two wheels."

 Tidy internal cable

 Practical carrying handle

Shimano Shoes

A good cycling shoe is a must for regular riding and if you want to go one step further, a clipless pedal and shoe combination is by far the most efficient system. With the widest range of cycling footwear in the world, Shimano offers 'SPD' (Shimano Pedalling Dynamics) shoes and pedals for every riding style.

On-road, off-road. On or off the bike, Shimano shoes provide comfortable pedalling stability along with durability and a casual look.

SHIMANO

Kryptonite Locks

Serious security is the only business Kryptonite is in. They are committed to providing innovative products to make sure that your bike remains where you left it. Kryptonite is a premier manufacturer of high-quality cables, chains, U-locks and flexible security systems for bicycles everywhere, wherever they are used, and wherever they are parked.

KRYPTONITE

A

Get more out of cycling. A Ridgeback would not be complete without products to enhance the experience. Here are some recommendations to keep you safe, maintain your bike and if you have children, allow them to enjoy it with you. For more information, please visit madison.co.uk

Madison Clothing

Madison clothing offers a range of the essential cycle clothing for all riders, with a wide range of sizes, shapes, and prices. The benefits come from improved comfort on the bike, and although all levels of rider will benefit from using a few items of specialist clothing, it is the occasional rider who will feel the biggest benefit.

MADISON

LAZER

Lazer Helmets

With over 90 years of experience Lazer is one of the most innovative helmet companies in the world.

Lazer's award winning Rollsys system permits accurate and progressive peripheral sizing adjustment by simply turning a small adjuster on the top of the helmet. The fit of the helmet is symmetrically tightened up with a simple one-handed adjustment without creating any pressure points on the head.

Lazer helmets offer a great combination of performance, value for money and style.

TRUFLO

Truflo

Truflo has been producing effective and good value cycle pumps since the 1980s. All Truflo pumps are strongly constructed and attractively styled, and provide reliable performance at high pressures and high volumes. Whether it's a floor pump to make light work of weekly top ups or a mini pump carried for emergencies, a good pump is indispensable. The Truflo range offers pumps for every situation.

Park Tools

Park Tool has been manufacturing bicycle-specific tools since 1963, and is the world's largest bicycle tool manufacturer. A long-term dedication to quality, innovation, and customer service has made Park Tool the first choice of professional and home bicycle mechanics around the world: whatever the task, you can rely on Park Tool to provide the right tool for the job.

Electron Lights

Electron lighting systems use the latest technologies and designs to offer exceptional performance and durability. The Electron range meets the needs of all types of riders and includes some outstanding products for situations where battery life and performance are of prime concern. From high power LED front lamps to micro-sized backup lights, Electron has it covered, so take a look at the range and see what the latest lighting technology has to offer.

Finish Line Lubricants

Everything you need to keep your bike running and looking like new. Since 1988, Finish Line has been proud to offer the best selling, highest quality, bicycle-specific care products available. Take a look at how they can help make your bike easier to pedal, shift better, and last longer. Finish Line Wet Lube is a long lasting and highly water resistant lube and offers proven performance on tours, in muddy off-road conditions and on long rainy commutes.

bobike®
bicycle safety seats

Bobike Childseats

Child seats are a great way to enjoy cycling with the youngest member of the family, and are an important first step to introducing the joys of cycling to the next generation.

With innovative designs, extensive research and development as well as rigorous endurance testing, Bobike child seats meet EN and TUV safety standards and provide children from nine months to 10 years old with optimum protection and seating comfort.

Ridgeback
connected

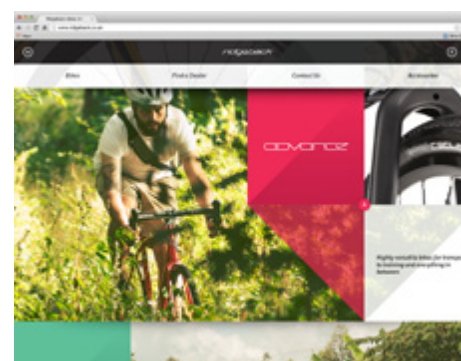

Keep updated with news, send us feedback and find your nearest dealer.

ridgeback.co.uk

Find a bike and check the spec ...

Complete information on each bike including weight, geometry and standover height.

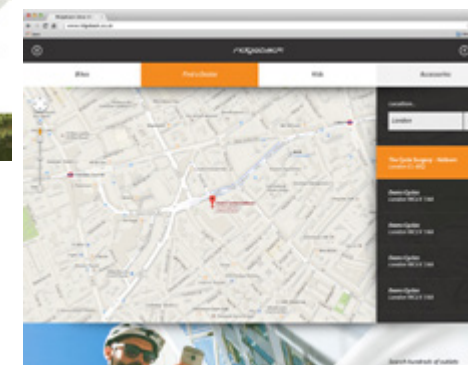

Compare models ...

Search by series or model and use the compare feature to show side by side comparison of two bikes.

Find a local dealer ...

A Ridgeback dealer offers complete advice and provides first class after sales service, as well as a free 30 day tune up. Because a bike is a safety critical product, we always recommend collecting your bike in person from an authorised Ridgeback stockist.

Have your say ...

Rider response is essential. Let us know what you think of your Ridgeback and see what other owners have to say. Just click on Feedback. Or if you have a question, use Contact.

News, advice and comment ...

Blog format news, stories and information.

Pedal for the planet ...

For every Ridgeback sold, a donation is made to organisations promoting the use of bicycles. Bikes and riding preserve our environment. By making cycling our first choice transport, we can all help to ensure our planet is still a great place to ride in the years to come.

Price and Specification ...

Prices include VAT at current rate and are correct at time of printing. We reserve the right to revise SRP and specification without notice. Please check on-line for current SRP and specification.

Guaranteed for life ...

Ridgeback means quality. Constructed to the highest standard, Ridgeback frames are built to last, so they're guaranteed for life.
