2015/16

From A to B

It's a healthy activity cycling. An efficient and accessible way to get around, it offers a unique freedom that other means of transport just can't match. At Ridgeback we continue to focus on all things cycling, offering a wide and varied range of bikes. Whether it's an early morning solo commute to work, or a casual weekend ride with family and friends, Ridgeback has it covered.

2016 is a year of evolution for Ridgeback. We have made a few subtle changes to some existing models to improve them further, but also added a few new models to sit at key price points.

The biggest news for this year is the addition of our debut E-Bike series, Electron.

Comprising of two models based around the same frame design, Electron utilises Shimano's state of the art STePS system. Combining a short charge time and a long battery life, STePS is a highly reliable system and a perfect match for Ridgeback. Offering smooth pedal assistance up to a speed of 25km/h, Electron is perfect for a wide range of cycling and an even wider range of users. This really is the future of cycling.

Happy Cycling.
Product Manager
Sam Lawson

Dual Track, our off-road series, has also seen a few changes for the new season. The brighter colour ways are an obvious change, but there is also a new frame platform for MX3 and MX4. Keeping on trend, these two models now feature a 27.5" wheel on sizes 17" and upward, whilst keeping a 26" wheel on the smaller sizes to make it an easy transition for younger riders moving up from a kid's bike.

The lightweight children's Dimension series was a big hit for 2015. It sees new options added in 16" and 26" wheel, but also two runner bikes in 12" and 14" wheel. Dimension is perfect for younger cyclists that ride more frequently.

Lastly, Rapide returns for its second year. Expanding upon a great debut range, we've introduced two new models in the shape of the RL Disc and RC Disc. Based around the standard rim brake versions, these new models offer improved braking in adverse weather conditions, bigger tyre clearance and also mudguard compatibility.

Whatever your riding style, we're sure you'll find a Ridgeback or Rapide that is right for you. Once you've found the bike that matches your needs, search for your nearest stockist at ridgeback.co.uk then go along and test it for yourself.

metro

Our best-selling commuter category, the Metro series is stylish and adaptable with the durability needed for everyday use. A short test ride of one of these benchmark commuter hybrids will confirm why this category is so popular.

With the strength of a mountain bike, new and improved geometry and fast rolling 700c wheels, the Metro's sleek aluminium frame provides a responsive yet resilient ride.

New for 2016; Velocity Disc combines an adjustable Ahead stem, Shimano componentry and cable actuated disc brakes at an affordable price point. The introduction of the Nova provides Ridgeback's renowned quality at an entry level price point. Featuring a great spec that includes Shimano components and Continental tyres, the Nova is an ideal first commuter.

The use of wide ratio Shimano componentry, puncture resistant tyres and ergonomic triple density grips ensure that a Ridgeback Metro is the ideal bike to get you from A to B.

Electron

Since the beginning Ridgeback has been known for providing high quality bicycles, specialising in commuter hybrids. As part of the never ending battle to improve, we are constantly looking at new technologies and designs.

We are extremely proud to introduce Electron, our debut E-Bike range.

More people are turning to E-bikes as a viable transport solution. Capable of transporting riders and luggage over roads that would be challenging without the smooth pedal assistance, E-Riders are getting further than ever while using less energy.

The use of Shimano's bench-mark STePS system provides a high level of reliability and an ease of use to match. With a charge time of 4 hours and a range of up to 125km*, STePS pushes the E-bike market into new territory.

Utilising a unisex step through design, Electron is offered in two specifications both using low maintenance Shimano internal hub gearing. Puncture resistant E-Bike tyres keep you glued to the tarmac whilst full length mudguards protect you from road spray when the weather turns. Wired-in AXA front and rear lights complete the package.

Visit ridgeback.co.uk to find your nearest dealer and head along to try an Electron for yourself.

NEVER BREAK A SWEAT

Unisex frame design

Wired-in front and rear AXA lights

Low maintenance Shimano Nexus hub gears

A side profile of a Ridgeback Electron bicycle in a light grey color. It features a step-through frame, a rear rack, a black saddle, and Shimano Nexus hub gears. The brand name 'ridgeback' is printed on the down tube.

Riders say...
"My Electron+ allows me to ride to work in my suit without breaking a sweat, I can carry all my luggage on the rear rack too."

FLIGHT

Quick and adaptable, a Ridgeback Flight performs at its highest level on the city streets and in rugged urban conditions.

Designed for fast commuting and keeping up your fitness level, Flight bikes are fitted with Continental Cyclocross Speed tyres for optimum comfort and grip.

Perfect for regular city riding, hydraulic disc brakes provide incredible stopping power in all conditions, especially in the wet, needing little adjustment as the pad wear is low.

A wide ratio Shimano drivetrain helps tackle the steepest gradients while the inclusion of rack and mudguard fittings further underlines the practicality of this exciting range of bikes.

AVENIDA

A modern take on the traditional 'Dutch' style bicycle, an Avenida is a stylish solution for people on the move. Comfort and low maintenance are the Avenida's priority.

Built to a high quality specification, an Avenida series Ridgeback offers easy shifting, great braking and either three or six gears.

The lightweight aluminium frame design with a deep step-through unisex design allows easy mounting and dismounting for stability and safe handling.

A comfy saddle, suspension seat post and smooth rolling, puncture resistant tyres enhance the Avenida's luxurious feel.

TRADITION

The Tradition is a prime example of taking a classic design and improving it without losing any of the original charm.

With a distinctive high at the front design, a long stainless steel stem and a swept back riser bar, the Tradition puts the rider within easy reach of the controls and offers a quintessential upright cycling experience.

Specified with straightforward low maintenance technology, the Tradition's characteristically compliant ride has been further enhanced by Schwalbe puncture resistant tan coloured tyres.

Available in three classic colours, a Ridgeback Tradition is light and comfortable with the riding position of an old-fashioned town bike. Travel in elegance and style.

World Series

Long distance tourer, rugged commuter or just for day rides, a Ridgeback World series bike offers a cycling experience steeped in history but with the benefit of contemporary technology.

Built to exacting specifications, our frames are constructed to a size specific geometry in a wide range of locations of seat tube lengths to ensure stability and sure handling even when fully loaded. Hand welded using renowned Reynolds steel or 6061 aluminium, a World series Ridgeback provides a responsive, comfortable ride with the structural reliability essential for a tradition expedition bikes. Tim and Laura Moss's round the world trip on standard Panorama's is truly a testament to this.

Designed for long periods in the saddle in remote locations, World series bike are sensibly specified. Brazed down tube cable stops mean traditional gear levers can be used if needed. All complete builds use a square taper bottom bracket to allow replacement with a more readily available cup and axle unit.

Supplied with a sturdy four point rack and full mudguards, a World series Ridgeback is built to explore distant places.

It's All About The Bike

In 2013 Tim and Laura Moss set off on a 13,000 mile cycle around the world aboard their Ridgeback Panoramas. With over a year in the saddle they reflect on their incredible journey.

www.TheNextChallenge.org

The kid leaned over, gave me a hug and told me he liked me.

'You should never leave'.

Before you suspect a scandal at Next Challenge HQ, my new friend was ten. His ardour was no doubt inspired by the fact that I'd lent him my head torch: if only picking up admirers was always that easy. Seconds later, his mother appeared and told us dinner was ready, so we trooped in for another family meal.

We had met his grandmother just a couple of hours before, outside a church as we looked for a place to camp. Janie had taken us back to her house and insisted we make ourselves at home, encouraging us to use the shower (probably for good reason) and finding us a space to put the tent up in her yard. Within minutes, we had made firm friends with her grandkids, who 'helped' us put up the tent, and felt comfortable enough to walk in and out of the house as though we were regular visitors.

It was the day before Thanksgiving and her five sisters were there, along with her mother and countless nieces, nephews and grandchildren. With such a large family, no-one batted an eyelid at our presence, probably assuming we were just cousins they hadn't met yet. The chaos, warmth and good humour meant that for one night only, we had become part of the family. When morning came, we were given a big bag of freshly baked muffins, declined several invitations to stay for Thanksgiving (stupid, we realise) and pedalled off with a lump in our throats, sad that we'd probably never see these people, our new Mississippi family, again.

This was just one of hundreds of human experiences we've shared across the world. We've stayed in the homes of countless people who were once strangers, been given bags of food by passing motorists and every single day, have conversations with at least a couple of people curious about our bicycles.

Being on bicycles mean that we attract attention. Travelling on an ultra-low budget mean that we have been forced to rely on the kindness of strangers: even on the odd occasion when sunset coincides with a nearby hotel or campsite, we usually end up finding someplace free to sleep, and in the process find people to talk to.

There's something about travelling by bicycle which means people approach us, far more than if we were travelling by car or public transport. Perhaps it's because we look more vulnerable, just us and laden-down bikes against the world, and people feel sorry for us. Perhaps it's because we inevitably spend most of our time off the beaten tourist trails, slowly making our way between the 'sights', so people are less weary of tourists. Perhaps it's because we look 'safe', particularly as we're a couple. Perhaps it's just because we're a massive novelty, especially when one of us has a huge ginger beard.

Whatever the reason, the bicycles have meant that this trip has been all about the people. The people we've met along the way have created the memories, the highlights and the stories with which we will be boring people for years to come.

We use online hosting networks such as Warm Showers and Couchsurfing, and have been welcome recipients of innumerable impromptu invitations from people we meet on our way. All over the world, total strangers have taken us under their wings. This isn't limited to any particular countries or social classes: all walks of people from all walks of life have showed us levels of kindness which could, and have, made us weep.

There was the couple in England who, ten minutes after we asked them for water, disappeared out for dinner while leaving us to hang out in their house for the night.

There was the family in Albania who gave us shelter from a storm, despite some initial confusion about body language, and showed us their daughter's fabulous 80s-style wedding video.

There was the group of blokes in Turkey who tried to help by building us a fire, with the result that we were driven from the abandoned building we were staying in by clouds of acrid smoke. Happily, they then found us a new place to sleep and arranged for their wives to cook us dinner.

There was the truck driver in Iran who mistook us for 'Ollie and George' (cyclists he'd met four years previously), but who took us home anyway and made us stay for far longer than we'd intended. We were privileged to be taken into one of the holiest shrines in Islam, usually off-limits to non-Muslims.

There was the village in India (and it was the whole village) which found us a spare house to sleep in, gave us dinner and then tried to give us a teenage son to take with us.

There was the tulip farmer in Japan who invited us in for coffee and ended up taking us out for dinner and putting us up for the night.

There was the couple in Australia who, after we stayed with them for one night, gave us the keys to their holiday home further down the coast.

There was the couple in New Zealand who both looked like Kevin Keegan, were off their faces when we arrived and proceeded to get even more wasted as they fed us beer and cheese toasties for dinner.

There was the lady who flagged us down in Texas, took us back to her mansion and cooked us an amazing dinner while we drank wine with her lawyer husband. We abandoned our British reserve as the guitars came out and we joined them in a rousing singalong to Home on the Range.

There was the lady in Louisiana – a real special soul – who lived with seven dogs and five cats, fed us crawfish caught in her flooded back garden and then gave us a packed lunch and a cookery book (including recipes for alligator and turtle) to take with us.

And, of course, there was our family in Mississippi.

These are just a few of the hundreds of examples we could give. It is the people who have made this trip, who have opened doors to their countries, their cultures and their homes. Strangers have become friends and friends have become good friends. We have learned to trust people, whatever their class, colour, ethnicity, religion or background.

Even more acute is the level of trust that people have displayed to us, as scruffy, foreign strangers. People give us keys to their houses, leave us to look after their animals and play with their kids. We've been offered garages, bakeries, schools, mosques, temples and churches to sleep in. Whatever you think about theology, the truth is that the compassion and generosity taught by all the major world religions is not just theoretical: the hospitality shown to us by various places of worship has been astounding. I write this from a church hall, where we have been left for the night after striking up a conversation with a man in a graveyard. He unlocked the door, showed us the well-stocked pantry and left us to enjoy the novelty of electricity for the night.

Above all, we have learned that most people are good people. Judging on appearance is futile: people all over the world share the same anxieties, joys and feelings as you and I.

A Hell's Angel motorcyclist approached us in Texas and, although we were initially cautious, he turned out to be an environmental lawyer, keen to recommend his favourite BBQ joint.

A veil-clad woman in Iran revealed that she was pregnant but was unable to tell her father as the thought of his (married) daughter having sex would freak him out too much.

A Greek monk dressed in flowing robes and with a beard even more impressive than Tim's approached us with a serious expression, before handing us two giant ice creams by way of greeting.

A rough-looking man cleaning public toilets in New Zealand gave us an in-depth analysis of the mixed member parliamentary voting system, much to Tim's delight.

Policemen everywhere have been a safe bet. Georgian police took us home for breakfast and vodka shots; Iranian police got so carried away with taking selfies that they forgot to ask for our passports and had to return later; Thai military offered us water, chocolate and money; Malaysian police let us sleep in a prison cell and American police gave us coffee (but sadly no donuts).

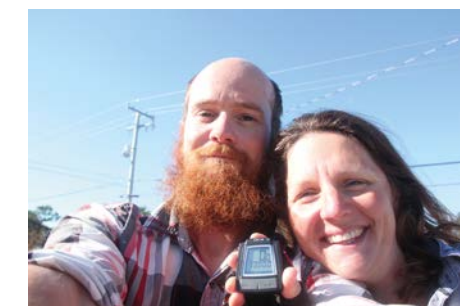

All of these people initially appeared mysterious, intimidating or at least very different to ourselves. They all surprised us. If travel opens the mind, travelling by bicycle blows it wide apart.

This trip wouldn't have been the same without the bikes. The bicycles have been our way in to the people, and the people have been our way in to a country and a culture. Without the bikes, we wouldn't have spoken to as many people, and wouldn't have learned about places to the same extent.

It's all about the bikes – because it's all about the people.

Tim and Laura will be holding their annual **Cycle Touring Festival** on the 27th–30th May 2016 at Waddow Hall, Lancashire. You can follow the event on twitter by following **@CycleTourFest** or visit **cycletouringfestival.co.uk**

DUAL TRACK

A robust all-rounder that's self-assured on rough terrain yet feels comfortably balanced on family rides along canal towpaths.

Reactive and intuitive, 26" wheel models use a classic single-track geometry for big ride feel and front end comfort.

The MX3 and MX4 share a new frame platform for 2016. Utilising 27.5" wheels on size 17" and upwards, they offer a responsive and efficient ride at a competitive price point. The smaller sizes in these two models keep the 26" wheel standard, offering proportionate sizing for younger riders when moving up to an adult's bike.

Completing the range are the X1 and X3, our rigid 29'ers. Specified with fast rolling tyres and wide ratio gearing, these bikes are ideal for single-track adventures.

Built with go anywhere ability, a Ridgeback Dual Track is as strong as it is agile whether negotiating a twisty trail or enjoying a leisurely ride in the park.

dimension

Lighter and more versatile than an MTB, a Dimension series Ridgeback combines the principles of a Metro hybrid with a specification and features designed for smaller riders.

Available in sizes ranging from a 12" wheel all the way to 26", Dimension combines a triple butted alloy frame with lightweight and robust components ideal for regular use. Utilising Shimano cassette hubs, stainless spokes and alloy rims, the Dimension has an all alloy parts mix to ensure that its weight remains low.

With a high quality specification to provide the necessary durability to allow the bike to be passed on to a second child, a Ridgeback Dimension is ideal for younger riders who cycle more frequently.
