

Ridgeback Bicycles – 2020 Collection

Model: Cyclone Step Through

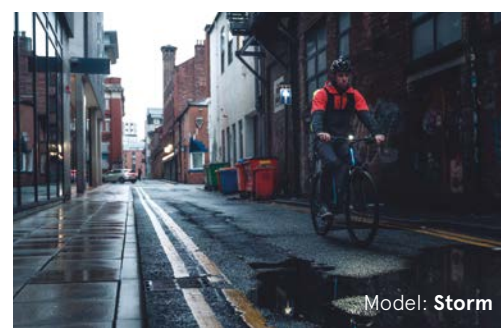

Models: Destiny & MX24

Our lightest and best ever kids range – [Page 10](#)

ELECTRIC BIKES

Our e-bike range continues to grow with our new Cyclone. The Cyclone has all the bells and whistles you will ever need with the remarkable Shimano STEPS system for when you need a little assistance and full mudguards, perfect for those rainy morning commutes – [Page 4](#)

Model: Storm

Weather the Storm of the daily commute – [Page 6](#)

In just three years' time, we at Ridgeback will be celebrating our 40th birthday. Where has the time gone? For nearly 37 years, we have been lovingly designing bicycles for the wonderful riders of our fair country. Over the years we've helped you learn to ride, get to work (& the pub) on time, explore distant lands & discover the unrivalled joy that two pedal-powered wheels can give you.

We haven't lasted this long without learning to change – which you can see from our timeline below – & the 2020 range is one of our biggest changes yet. After the launch of our new re-brand back in February 2019, we have now extended that across the entire range and put in some

long hours to bring you bicycles that we hope you'll be as excited as us about. This is more than product evolution. It's a full-scale revolution!

As you flick through the pages of our latest catalogue, the big changes are there to see, but pay particular attention to our new-look leisure & commute range, our best-selling children's bikes & our ever-expanding collection of electric bicycles. We have even introduced our first-ever E-Cargo model, demonstrating once more that when it comes to bike design, we never stand still.

Functional, desirable, attainable.
Welcome to the new Ridgeback.

Making History – since '83

At Ridgeback, we've been building bikes since 1983 and have an unmatched reputation for innovation and quality. From high performance flat bar and touring bikes to comfortable commuters and children's bikes, we lead the way. Take a look back at some of our landmark bikes here...

THE FIRST RIDGEBACK

In the beginning

Ridgeback launched the UK's first mountain bike.

Everyday Cycling

The Ridgeback Roxy arrived in 1990 and it was an early forerunner of today's Leisure and Commute range – the benchmark by which all other commuter bikes are measured.

GENESIS DAY 03

Something totally new

In 2001, we created the flat bar road bike. Originally called Genesis, this new breed of fast commuter sports bike was regarded as a significant development in cycle genres.

Despite having evolved significantly, the DNA of this bike runs through today's range.

SWITCH STORM

Mountain or Street Bike?

Our Urban series was another trend setter. Developed back in 1998, these slick-tyred street mountain bikes were not only lots of fun to ride but provided a real alternative to the more traditional style commuting bikes.

They became the Switch series in 2003, and the line ran right up until 2012.

ELECTRIC BIKES

E-BIKE SYSTEMS

At Ridgeback we're proud to use two of the best electric bike systems on the market.

Launched in 2013, Shimano STEPS popularity has grown quickly with cycling enthusiasts and every day users alike. Designed around a smooth mid-motor design, it offers a cycling experience that is unparalleled in efficiency, squeezing every last drop of power out of your battery. With systems offering 40, 60 and 70nm of torque, STEPS has an option that is perfect for every style of electric bicycle.

New to our range for 2020 is Sport Drive. Designed by our assembly partner in Europe, Sport Drive is the perfect system to compliment Shimano STEPS. Working on a similar mid-drive system, Sport Drive uses a Dapu drive unit paired with a Panasonic battery. Household names in the electronic industry, providing an exciting electric bike experience at a fantastic price point. For 2020 we are offering Sport Drive in two configurations, our E-SUV Arcus model is ready to tackle rough tarmac, gravel and trails whilst our familiar Electron model is perfect for everything from commuting to the weekend spin to the shops.

Model: Electron +

SYSTEM HIGHLIGHTS

SHIMANO STEPS

418wh – 504wh battery capacity • 40/60/70nm drive unit torque • 250w drive unit power • Up to 180km range • 4.5 – 7.5 hour full charge time

SPORT DRIVE

300wh – 400wh battery capacity • 95nm drive unit torque • 250w drive unit power • Up to 100km range • 4.5 – 6 hour full charge time

DUAL TRACK ADVANCE

Big wheels keep on rolling

The Dual Track was a robust all-rounder with 29" wheels, aimed at riders looking for a more comfortable off-road experience.

Originally designed as a mountain bike, today's Dual Track is more off-road hybrid than MTB.

Using 700c road rims instead of traditional 26" wheels, the Dual Track's larger tyres give the bike a longer contact patch for improved traction while rolling over lumps and bumps smoothly.

FLIGHT R25

25th Anniversary

In 2008 we launched the R25 to mark our 25th anniversary. It was a limited edition of one hundred very special flat bar road bikes – at the time it was Ridgeback's most advanced flat bar we'd ever made.

Five years on and it's clear that the R25 was a precursor of the future of braking on flat bar bikes as it was equipped with Shimano Deore XT hydraulic discs. Today, all Flight series bikes come equipped with hydraulic disc brakes.

SUPERNOVA XT

30th Anniversary

It's been 24 years since we launched our first hybrid bike, the Roxy. That bike was a predecessor to the Metro series, one of the most successful commuter bike ranges in the UK.

To celebrate our 30th anniversary, last year's Metro series included a limited-edition Supernova equipped with Shimano's premium level Deore XT components. The 2014 Supernova XT offered fifty lucky riders the opportunity to own a practical and comfortable commuting bike of the highest quality. On top of that, each one was individually numbered from 1-50, making them an exclusive purchase.

X2

The here and now

2019 has been a huge year of change here at Ridgeback. A complete rebrand, new frame designs and new models galore, we've really jumped to the next level. But our most exciting development has been the rise of the electric bike. They're perfect for everything from commuting to leisure riding – and even delivery with our new cargo model.

Electric bikes are the future and we have plans to expand our range even further over the coming months and years. Our pick of the current bunch is the X2, falling in the E-SUV category, it's ideal for tackling both track and trail seven days a week.

ELECTRIC BICYCLES

Our new range of e-bikes take stress free cycling to another level. Utilising cutting edge systems from Shimano STEPS and Sport Drive, you can forget the notion that electric bikes are just for the elderly. A perfect alternative to public transport or driving, the pedal assistance of an electric bike gets you from A to B with minimal fuss and maximum fun. Specified with batteries ranging from 300wh to 504wh, a range of up to 180km is achievable depending on the riding conditions. For convenience the battery can be charged on and off the bike making it simple to top your levels up whilst at work – simply take the battery off the frame and plug it in. With charge times ranging from 4.5 to 7.5 hours, a Ridgeback e-bike is perfect for daily commutes, the weekly shop or even taking the kids to school.

Integrated looks paired with sophisticated, class-leading assistance provides a cycling experience that is guaranteed to put a smile on your face and leave your car on the drive.

SHIMANO STEPS

X2

Frame: Ridgeback e-Trail Aluminium 6061 **Fork:** Suntour NEX 63mm Travel
Drivetrain: Shimano STEPS E-5000 x Altus 9 Speed **Motor:** Shimano STEPS DU-E5000 36v 40nm 250w
Battery: Shimano BT-E8014 418Wh **Tyres:** WTB Riddler 700x45c **Brakes:** Shimano MT200 Hydraulic Disc Brake
Sizes: Small / Medium / Large **Colour:** Orange

One of our best selling ebikes, the X2 is light, off road, built around our tried and tested 6061 head treated aluminium frame with Shimano E5000 at the heart. Offering a smooth natural delivery of power assist the Shimano STEPS system allows you to take on more trails and longer rides with confidence.

Sizes: One Size **Colour:** Black

LEISURE & COMMUTE

Focusing on three core areas, our series goes big on comfort, practicality and reliability. Features like wider tyres, new and improved geometry and a high-density saddle material put the pleasure back into cycling. Clearance for mudguards and mounting points for a pannier rack ensures you'll be sorted for riding in all weather conditions, whilst being able to carry luggage with ease. Shimano componentry provides precise shifting and braking, taking away the stress of clumsy gear changes when you hit that hill you hate 1km from home, whilst giving you confidence in descending the other side.

The overhauled Metro range offers great bicycles at great price points for everyone from the daily commuter to the fitness enthusiast.

TOURING

WORLD SERIES

Our classic range of touring bikes will always hold a special place in our hearts. Providing a cycling experience built on years of product feedback, a Ridgeback World Series bike is perfect for everything from weekend excursions to round the world epics. Lightweight aluminium makes the Tour an ideal bike for weekly commutes as well as being a perfect entry into the world of touring. Our range-topping Panorama combines the magic carpet feel of British steel brand's Reynolds iconic 725 steel tubeset with

the incredible stopping power and modulation of TRP's highly regarded Spyre disc brake.

Classic designs refined over years of production. A World Series bike is the perfect steed for even the most ambitious touring adventures. This year we've helped a couple on a 12-month long round the world cycling epic as well as a young Irish rider pedal his way all the way to Asia!

As you can see in our timeline, Ridgeback actually started out as a mountain bike brand in 1983 and although we have changed a bit, we have never lost our love for the off-road.

Our latest 4-strong range, named Terrain – are ideal for those that prefer the comfort of wider tyres and front suspension or beginner mountain bikers looking to branch out into more serious off-road adventures.

Built around a dependable aluminium frame, each Terrain model packs 100mm of travel up front to soak up bigger bumps and small drops with a dependable Shimano drivetrain. Rolling on grippy 27.5" Trax tyres, the Terrain range gives plenty of confidence when departing the canal toe paths in search of something more challenging. The Terrain 2 is also available in a low step-over option for those that prefer.

TERRAIN

Designing children's bikes may well be the most rewarding part of the job for us. When we see an Instagram clip of some youngster getting to grips with a balance bike or learning to pedal for the first time, it makes all the hard work worthwhile.

Our best-selling range of children's bikes gets even better for 2020. A complete redesign of the Dimension range sees updates to the frame design, a new lightweight aluminium fork, lightweight aluminium handlebars and stems along with a new wider tyre that improves comfort and confidence for all ages. The changes made to the Dimension 16 have saved over 800g in weight against the previous model, making it one of the lightest 16in children's bikes on the market.

Our long-running MX series has updated colours and graphics and are now paired with an A-head stem on all sizes for 20in upwards. This helps save weight, improves looks but also offers the same range of adjustment as the previous design. We have even added two new models in the Serenity and MX26. Based around a 26in wheel and a robust specification, it's the ideal bike for those fast-growing kids.
